

PROTECT THE EARTH!

STOP THE MONEY!

Fossil Fuel companies rely on our banks to finance new oil and gas extraction projects. JPMorgan Chase, Wells Fargo, Citibank and Bank of America provide major financing for climate destroying fossil fuels, but also provide us our banking and credit card services.

Here are four simple things anyone can do. Start with #1:

1. Sign the call for banks to change: www.fossilbanks.org
2. Consider changing your banking and credit cards to supportive companies
3. Get one family member or friend to do #1, 2 & 3.
4. Join small groups of us each Friday afternoon leafleting downtown, often in front of banks. Look for the banner or check the event schedule on our website home page for times and locations: interfaithearthkeepers.org.
