

HOW TO CLIMATE STRIKE...

1. Talk to your parents explaining why and what you are doing. Ask them to support you.
2. Record a video telling your story + post it. Send it to leaders and influencers. Call them to join
#ClimateStrike #ActNow, #FridaysforFuture contact the media.
3. Make a sign calling for what you want your leaders to do. Be creative!
4. Talk to your friends and teachers. Tell them why you are on strike and ask them to join you.
5. Share the site FridaysforFuture.org. Copy this zine + hand it out.
6. Join the #ClimateStrike on Fridays and on Global Days of Action. Agree on a specific time. When the time comes, walk out of school in whatever way you think is best.
7. Once walked out, choose what is right. Hold a rally, or sit on city hall/courthouse, or politicians! Steps with signs. Demand your local politician take urgent action on climate change.
8. Share photos and videos of #ClimateStrike

- You can learn how to talk to people about climate change informatively and skillfully.
- You can learn more about the science behind what is happening to our climate.
- You can learn more about politics: both in how to engage our political system and WHY there has been no action and rising levels of carbon despite the facts.
- What is nonviolent resistance?

There is a world wide movement of students who are walking out of school and going on **#ClimateStrike** to call on governments to keep warming below the detrimental level of **1.5°C** and protect our future.

CLIMATE CHANGE IS PART OF A LARGER

ECOLOGICAL CRISIS

THAT IT IS TIME TO FACE.

is your love greater than your fear?

please care.

"WE ALREADY HAVE ALL THE FACTS AND SOLUTIONS. AND WHY SHOULD I BE STUDYING FOR A FUTURE THAT SOON MAY BE NO MORE, WHEN NO ONE IS DOING ANYTHING TO SAVE THAT FUTURE? AND WHAT IS THE POINT OF LEARNING FACTS WHEN THE MOST IMPORTANT FACTS CLEARLY MEAN NOTHING TO OUR SOCIETY?..."

"SOME PEOPLE SAY THAT I SHOULD BE IN SCHOOL INSTEAD. SOME PEOPLE SAY THAT I SHOULD STUDY TO BECOME A CLIMATE SCIENTIST SO THAT I CAN 'SOLVE THE CLIMATE CRISIS'. BUT THE CLIMATE CRISIS HAS ALREADY BEEN SOLVED. WE ALREADY HAVE ALL THE FACTS AND SOLUTIONS. AND WHY SHOULD I BE STUDYING FOR A FUTURE THAT SOON MAY BE NO MORE, WHEN NO ONE IS DOING ANYTHING TO SAVE THAT FUTURE? AND WHAT IS THE POINT OF LEARNING FACTS WHEN THE MOST IMPORTANT FACTS CLEARLY MEAN NOTHING TO OUR SOCIETY?..."

WHAT TO DO?

- Whether you are old enough to vote or not, you can and should call your senators and representatives.
- Better, if you can, visit them in person.
- Best, believe it or not, contact them by fax.
- You can ask your parents and friends to do the same.
- You can and should contact your local legislators, too.

- You can contact your local or national news and media sources and demand that they cover the climate crisis.

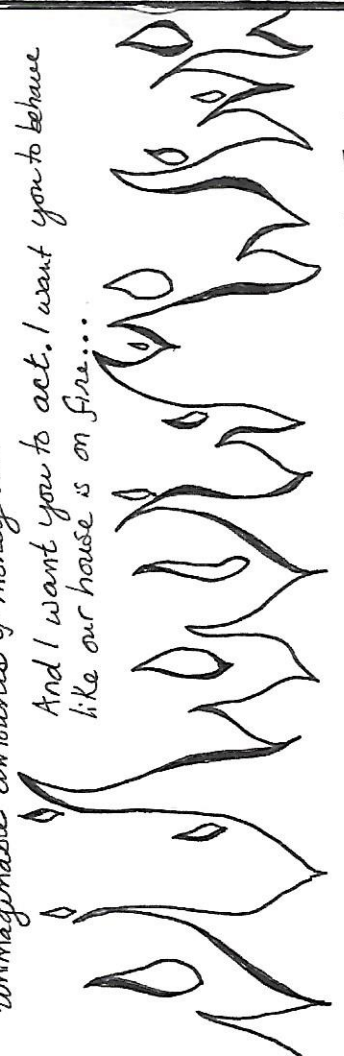

Do your senators and reps support the Green New Deal?

- The Energy Innovation and Carbon Dividend Act?

Are pipelines or refineries being proposed for your state?

- Greta Thunberg to Global Leaders at Davos 2019

BECAUSE IT IS.

And I want you to act. I want you to behave like our house is on fire....

"Some people say that the climate crisis is something that we have created, but that is not true, because if everyone is guilty then no one is to blame. And someone is to blame. Some people, some companies, some decision-makers in particular, have known exactly what priceless values they have been sacrificing to continue making unimaginable amounts of money...."

○ WHAT DOES IT MEAN TO BE A GOOD PERSON IN THESE TIMES?

Ask yourself

I want to talk about traditional values here: about service to community and a desire to live a meaningful life. In facing the risk of life on Earth dying, can I step forward and be willing to offer my service to something bigger than myself? Can I act to protect what is

US DEMANDS

- 1- That Government must tell the truth about climate and wider ecological emergency, and must reverse all policies not in alignment and work with media to communicate urgency...
- 2- That Government must enact legally binding policies to reduce carbon emissions to NET 0 by 2025 and take further action to remove the excess of atmospheric greenhouse gases...
- 3- We don't trust our Government to make bold, swift, and long term changes necessary... we demand a Citizens' Assembly to oversee the changes
- 4- We demand a just transition that prioritizes the most vulnerable.
