Working hours  
Part-time

Start Date  
immediately

Location  
Tbilisi, Georgia

### Your Role

As a Drone Pilot for December32, you will play a key role in capturing geospatial data and imagery to support INTAKTIS – Infrastructure Management Software – customer projects in Georgia. The role involves planning and executing drone missions to collect footage and datasets for digital twins, infrastructure monitoring, and capability demonstrations of the INTAKTIS software. You will work closely with the project management officer in Georgia to align mission objectives and schedules, ensuring compliance with local regulations and technical requirements. Beyond flying, you will support operational tasks.

Drones: DJI Mini 5 Pro & DJI Matrice 4E for infrastructure inspection and digital twins

Growth Offer: Drone Pilot training to accelerate your growth as a professional drone pilot in Georgia.

Target Flight Hours per Month: Min. 64 (semi-flexible schedule) – The Drone Pilot role will be remunerated on an on-demand basis with reasonable transportation costs being covered.

Responsibilities include, but are not limited to:

- Operate UAV to capture geospatial data, imagery, and video footage.
- Conduct missions for INTAKTIS customer trials in Georgia across sectors such as real estate, powerlines, telecommunications, forestry, agriculture, and others.
- Collect area image footage, recurring datasets, and infrastructure asset imagery for digital twin creation and capability demonstrations.
- Plan and schedule drone missions based on desired project outcomes and timelines.
- Align mission objectives and reporting with the PMO in Georgia.
- Ensure compliance with Georgian drone laws, regulations, and safety frameworks.
- Participate in December32's drone pilot onboarding and training program.
- Support operational tasks related to drone flights (e.g. coordinate maintenance).
- Maintain clear communication and documentation in Georgian and English for project coordination and reporting and professionalism in communication with stakeholders.

Requirements:

- Some drone pilot experience, ideally with DJI Matrice 4E or previous models.
- Understanding of flight conditions (e.g. wind).
- Knowledge of, and compliance with, Georgian drone laws and legal frameworks.
- Willingness to participate in December32's onboarding and training program.
- Ability to understand and apply technical requirements for capturing requested imagery.
- Good written and spoken English skills (Georgian language assumed as local working language).
- Driver's license and access to a car preferred, but not mandatory.
- Team player who is seeking an opportunity to grow professionally.

Interested? Send your CV and a short introduction explaining why you're the right fit to
