- Collaborates and consults with interdisciplinary team regarding clinical education outcomes.
- Coaches others in clinical decision making and problem-solving.
- Collaborates with physician partners on staff education issues.
- Provides communication of education updates and other material in a timely manner.
- Maintains current clinical skills and competencies.
- Provides educational activities and orientation designed to improve clinical competence and foster professional development through mentoring and performance review
- Coordinates and conducts department educational in-services
- Supports and mentors staff and other departments in clinical skills.
- Supports relationships with other departments' educators to ensure appropriate resources are accessible for clinicians.
- Partners with leadership team to implement education associated with system changes.
- Oversees orientation program for new employees, clinical student placement, and system respiratory initiatives to include NRRP and PEP students.

Children's Healthcare of Atlanta, Scottish Rite,

Aug. 2016-Oct. 2018

Staff Respiratory Therapist

- Provide critical care to pediatric and neonates using therapies such as ventilator management, airway management, nitric oxide therapy, heliox therapy, blood gas analysis, and interpretation.
- Current Neonatal Transport team member since June 2017

Northside Hospital, Atlanta, GA, Dec. 1999 – Apr. 2017

Manager, Respiratory Therapy Department

Nov. 2012 – Oct. 2014

- Ensure compliance for respiratory care services as set by the Joint Commission for the Accreditation of Healthcare Organizations (JCAHO)
- Prepare departmental operating and capital budgets. Monitor and analyze productivity and financial reports
- Maintain technical skills necessary to perform patient care and ensure proficiency of staff.
- Research technical advances and incorporate new technology into department services as appropriate.
- Resolve interdepartmental patient/staff issues.
- Develop and administer the departmental Quality Improvement plan in a manner consistent with the hospital's Mission and Values statement. Ensure compliance with all applicable regulatory and accreditation agencies.
- Project Manager of remote monitoring implementation tri-campus for post-operative PCA/Epidural patients at risk for over sedation and other high risk respiratory complications after surgery.

Georgia State University, Atlanta, GA

Adjunct Professor

Sept. 2012- Present

Cardiopulmonary Resuscitation (CPR) and Application of Physical Principles in Healthcare

- Prepared and facilitated course lectures, grade submission, student counseling, and mock skills assessments.
- Instruct students on using the proper techniques of basic life support, including adult, pediatric, and infant resuscitation.
- Engage and discuss with students the scientific basis for therapeutic and diagnostic techniques, and related equipment, with emphasis on physical and chemical principles of health sciences.

Northside Hospital, Atlanta, GA

Clinical Supervisor, Respiratory Therapy Department

Oct. 2011 – Nov. 2012

- Assigned and monitored work; managed resources to maintain efficient use of additional staff, overtime, and resource personnel.
- Participated in departmental budget by continually monitoring and adjusting staffing to meet workload requirements; generated and analyzed productivity reporting to justify staffing adjustments; and the need for hiring additional staff.
- Interviewed, hired, and trained staff; served as a clinical resource; assisted staff in setting and achieving professional goals.
- Managed the daily and on-going scheduling of staff.
- Handled customer service complaints.
- Maintained rapport with physicians and other hospital employees; contact physicians when test results or patient's condition warranted a change.

Arterial Blood Gas Lab Supervisor, Respiratory Therapy Department

Jan. 2009 – Oct. 2011

- Ensured laboratory compliance with the state licensure, Joint Commission, and College of American Pathologists (CAP).
- Monitored and periodically revised Quality Improvement program for the Pulmonary and Arterial Blood Gas Laboratories. Prepared quarterly reports on Quality Improvement issues.
- Controlled departmental budget, and authorized purchases for routine supplies.
- Ensured life support blood gas analyzers are functioning properly; performed maintenance, troubleshooting, and minor repairs on blood gas and pulmonary diagnostic equipment.

Level III Respiratory Therapist, Respiratory Therapy Department

Dec. 2003 – Mar. 2007

- Provided daily assignments for the adult and/or neonatal care areas of Respiratory Care.
- Assisted the supervisor in monitoring work of the Respiratory therapist and acted as a professional resource for the assigned area.
- Provided input to clinical supervisor regarding staff performance.
- Performed the duties and responsibilities of the clinical supervisor in the supervisor's absence.
- Responded to all code blue and rapid response calls.
- Provide clinical expertise and back-up support to staff as needed.

Level II Respiratory Therapist

Dec. 1999 – Dec. 2003

- Provided general floor care therapies such as aerosol therapy, chest physiotherapy, noninvasive ventilation, metered dose inhaler therapy, and oxygen therapy.
- Administered Adult and Neonatal critical care to patients by ventilator management, blood gas analysis and interpretation, transports, bronchoscopies, airway management, nitric oxide therapy, and attend high risk deliveries.
- Served as the Relief Charge in the absence of Level III.

Georgia Medical Institute, Atlanta, GA

Adjunct Instructor

Jan. – Nov. 2005

- Instructed respiratory students using lecture on various modalities relevant to respiratory care.
- Aided with accreditation according to CoARC guidelines and recommendations.

DeKalb Medical Center Hillandale, Lithonia, GA

Staff Therapist

Nov. 2006 – Aug. 2007

- Maintained floor care through aerosol therapy, chest physiotherapy, non invasive ventilation management, patient education, metered dose inhaler therapy, oxygen therapy, and EKG's.
- Managed Adult and neonatal critical care via ventilator management, blood gas analysis and interpretation, transports, bronchoscopies, emergency airway management, high risk deliveries, and trauma therapist.
