

Outcome Measures in Practice

DATE ECHO/University

Case Presentation Template

ECHO DATE:

Name of presenter:

Key Question and Points for Discussion

Please identify the change intended, your primary concerns as well as your goal for this case presentation.

Background information/setting the scene

What is the case for change e.g. Introduction of outcome measures? Include here key points that will help the participants understand the situation.

Interventions/development

What is the current status of the patient e.g. what have you done or observed.

Output

What factors have enabled the patient to progress or kept the patient from progressing to the desired level?

Outcomes

Any impact to date on patients/families, you and/or your service, other services or the wider health and social care system. Include here outcomes e.g. the changes that were made because of the interventions by either you or your center. Were there any barriers/ constraints? What might have happened without this intervention?

Actions and proposed date for follow up case presentation
