

NY Center for Kidney Transplantation

Who Are We?

The New York Center for Kidney Transplantation is a nonprofit organization comprised of the transplant centers in New York State. Our consortium members are passionate, innovative and focused on saving the lives of New York State patients that are in need of kidney transplants. Together, we provide a stronger voice for the kidney transplant programs and the kidney transplant patients of New York State.

Our Mission

NYKidney's focus is education, efficiency and advocacy through collaboration within the transplant centers, organ procurement agencies, patient advocacy groups, and the public. We aim to perform public and professional outreach, provide comprehensive accurate and current information on kidney transplantation and living donation, and advocate on the state and national level to improve care and remove disincentives to patients with End Stage Renal Disease (ESRD) and their donors.
