Mr. Nathan Akridge
Division Safety Director
Stevens Engineers & Constructors, Inc.
5997 Carlson Avenue
Portage, IN 46368

Dear Mr. Akridge

Congratulations, Stevens Engineers & Constructors, Inc. has been awarded a 2010 Thomas J. Reynolds Award for construction safety and health from The Association of Union Constructors (TAUC)!

These prestigious safety awards recognize the outstanding achievements of our members to minimize the number of work site accidents, injuries and illnesses. Based on the combination of data from your application and OSHA logs (number of hours worked and cases from Columns H & I), your DART rate was 0.94. To be eligible for an award, your DART rate had to be below 1.725, which is 25% below the most recent Bureau of Labor Statistics (BLS) national average of 2.3.

Plaques are presented to contractors achieving a DART rate of zero and Certificates of Achievement will be presented to companies with a DART rate 25% below the national average. Stevens Engineers & Constructors, Inc. will be recognized with a Certificate of Achievement during TAUC Leadership Conference 2011 taking place May 10-13 at the Greenbrier Resort in White Sulphur Springs, West Virginia. The awards luncheon will be on May 11th.

In order for Stevens Engineers & Constructors, Inc. to be recognized at the awards luncheon, a representative from Stevens Engineers & Constructors, Inc. must be a registered conference attendee. If you haven't already done so, please make arrangements for a company representative to attend the Leadership Conference and accept this award in person. As a winner of the Thomas J. Reynolds Award, we have extended our conference early bird pricing for you through April 1, 2011. To register for the conference, please visit www.TAUC.org or contact Gwen Jackson, TAUC Office Manager, at (703) 524-3336 ext. 111 or via email at gjackson@tauc.org.

Lastly, should your company wish to further align itself with TAUC's safety award program, we are accepting sponsors for the awards luncheon up to April 1st. Sponsors will have signage at the luncheon, on-site during the conference and their logos will be in the conference program and on marketing materials. Please see the attached form and check "Safety Award Luncheon" to reserve a sponsorship. Thank you for your consideration.

Again, congratulations on this honor and thank you for your company's commitment to worksite safety and health. I look forward to seeing you at The Greenbrier!

Very truly yours,

A handwritten signature in black ink, appearing to read "Robert W. Santillo".

Midwest Steel – Waste Water Treatment Modernization Project – Portage, IN

Contractor Safety

On September 26, 2017, a Contractor Safety Summit was held for those who participated in the Ascend Pensacola Contractor Safety Forum. The forum, a voluntary organization focused on safety leadership, hazard recognition, and process improvement, is composed of multiple contract organizations and Ascend employees. The summit was a look back at the positive change contractors have brought to our organization.

The Safety Beacon award is given out to one individual and one organization that excels in a proactive safety approach and leads by example for their colleagues or other organizations in best safety leadership practices.

The organizational winner of this year's Safety Beacon Award went to CIS for their development of safety systems.

The individual winner of the Safety Beacon award for this year went to Katie Ross for her proactive approach toward the tracking and trending of leading indicators.

The 3000 award is given out to one individual and one organization that are deemed to be best in class for the year.

This year's 3000 award for an organization went to Mundy Maintenance. Mundy met the criteria regarding participation, policy, and practice.

The 3000 award for an individual was given to Glenn Hardy. Glenn worked not only to recognize hazards, but also to recalibrate his approach and method to how safe work is conducted at 3000 Chemstrand. Glenn worked collaboratively almost daily with Ascend ESSH and Contractor Safety Leads to share hazards, their affiliated action items, and best practices in mitigating risks. Leading by example Glenn, showed others throughout the organization that it is ok to "Stop, Assess, and Act" when a hazard is recognized or general uncertainty arises on the job site.

The Ascend Pensacola ESSH Department would like to thank and congratulate the individuals and the organizations achieving these milestones. The Ascend Pensacola Contractor Safety Forum is held every Wednesday in the 702 conference room at 8:30 a.m. Contractors and Ascend employees are welcome to attend, discover trends the team is tracking, and calibrate to a 3000 Chemstrand collaborative effort in continually improving safety practices. The meeting is facilitated by Mike McEvoy, but led by those who choose to participate.

On Wednesday September 27, 2017, a safety luncheon was held for The Mundy Companies Maintenance Group at Ascend Performance Materials in Pensacola, Florida for reaching five years OSHA Recordable free. Several Ascend and Mundy management members were onsite to recognize and join in the celebration. Ascend Performance Materials LLC manufactures and supplies chemicals, fibers, and plastics products for use in various commercial and industrial products.
