

DOSE MATTERS

Designed by world leaders in Regenerative Medicine, KEY PRP and i-PRF is a proprietary platelet-capture technology system that allows the user to control and customize all variables related to platelet-rich plasma composition.

It features a patent-pending platelet collection surface that yields the highest increase over baseline, greatest volume reduction, lowest hematocrit, and highest platelet recovery.

Available in both dual-spin and single-spin procedure packs, users will be able to produce PRP or injectable PRF in minutes.

KEYPRP

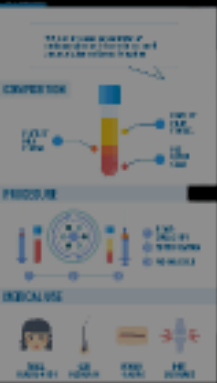

The Key to Accelerated Healing™

MedWell

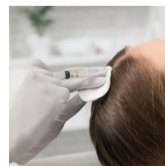

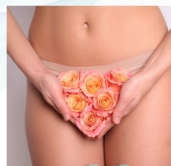

Technologies

New Advanced PRP System available!!

KEY PRP/PRF was designed for physicians to allow for customizable treatment options. KEY PRP processing protocols can accommodate any clinicians preferred biologic.

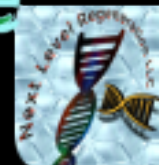

- Single platform for processing both PRP and PRF
- Process 20ml up to 160ml's of whole blood
- Produces a chemotaxic gradient from 3x-50x
- Single-spin and double spin kit configurations
- LO-PRP, LR-PRP, and LP-PRP protocols
- Predictable and Reproducible
- Compatible with many existing centrifuges

Many other things available for bulk office use or patient specific!
