SWEEPSTER

The Power of Combined Excellence

Convuluted & Flat Wafers

Polypropylene

Excellent for all types of sweeping, our high quality poly brushes have superior flicking action, for excellent material movement and clean sweeping. The polypropylene brushes are easy on all surfaces.

Wire

Wire wafers are generally used with polypropylene wafers to make poly/wire brushes. They are perfect for gravel, loose stone, and dirt - wherever heavy-duty cleaning is needed.

Dual-plane crimping and no break wire give maximum, long lasting strength.

Combination

Sweepster's multi-purpose combination poly/wire brushes give you the versatility of poly and strength of wire in one section, at an affordable price.
