## HOUSE NUMBERS

The *Drexler Birth Index* includes the house number for most of the births in Soufflenheim from January 1, 1811 to December 31, 1829. Pre-printed forms were first used in 1811, and included a space for recording a house number. The 1829 forms were the last to provide this space.

Approximately four pages of 104 pages of births do not list a house number (4.6%), typically because no number was provided, occasionally because the number was illegible. Death records during the same period as the birth records also contain house numbers.

According to Mark Drexler:

“The birth and death records from 1811-1829 tell only the house number at which the birth took place; they do not explicitly associate a house number with its residents. The earlier, long records named the resident of the birth house, but did not give a number.

There are numerous inconsistencies and ambiguities. House numbers are poorly written using numerals, rather than spelling out numbers, and it's often impossible to tell what number the scribe intended. Each house number seems to have had multiple residents, sometimes even concurrently, and it seems that any particular person is associated with multiple houses.

The general appearance of the data leads one to think that most people were moving constantly - sometimes just next door, sometimes across town. I suspect a number of births were not at the mothers' residences. The highest house number in the birth records increased significantly between 1811 and 1829, which seems to suggest that each new house received the next-higher available number.”

Records have been sorted by:

- House, Date
- Father's Name, Mother's Name, Date

Children's surnames have been standardized, consequently occasionally different from that of the father.

## LAND SECTION HOUSES

Soufflenheim house records in land sections (area of birth) are provided from January 1, 1793 to September 1, 1793 in the original birth records. They are also listed in the *Drexler Birth Index 1792-1862*, which recorded all auxiliary information in the birth records, such as sections and areas (Upper Village, Oberdorff). Most of the original records list a section only, without further description.

The eight months of birth records show Soufflenheim houses in two sections: Section S and Section T. Ten records mention Section S and 41 records mention Section T.

- Section S is described in two records as “Over the Bridge”, presumably the bridge over the Eberbach leading north to the Rue de Koenigsbruck and Rue de Betschdorf.
- Section T is described in five records as “Oberdorff” (upper village) and in one record as “Bischwiller Street”, also in the upper part of the village.

Sections have been sorted by:
