Model T Ford
The Model T Ford was the first mass-produced automobile. It was designed by Henry Ford and first introduced in 1908. The car was revolutionary because it was affordable and easy to maintain. It was the first car to have a steering wheel and a gear shift. The Model T Ford was also the first car to have a spare tire mounted on the side. It was a simple, reliable, and durable car that became the most popular automobile in the world. It was produced for over 20 years and over 15 million units were sold.

Exterior taken from "Model T Advance Catalog," 1908
The Model T Ford was the first mass-produced automobile. It was designed by Henry Ford and first introduced in 1908. The car was revolutionary because it was affordable and easy to maintain. It was the first car to have a steering wheel and a gear shift. The Model T Ford was also the first car to have a spare tire mounted on the side. It was a simple, reliable, and durable car that became the most popular automobile in the world. It was produced for over 20 years and over 15 million units were sold.
