## NOW WHAT DO I DO?

Now that your vehicle is looking its very best again, you may be asking yourself, "How do I keep it looking this way?"

## HAND WASHING

Hand washing is the very best way to remove all dirt and environmental fallout from the surface of your vehicle. Unlike automated car washes, which destroy your vehicles finish, handwashing will ensure every inch gets washed including those complicated body lines and intricate grills.

Setting up a maintenance package with BXC is the best option, however anyone can perform a simple hand wash if they have water, the correct soap / chemicals, the right wash mit / tools and drying towel.

Below is a list of what I recommend and use personally on my vehicles and clients vehicles.

## TOOLS

### *(The Basics)*

- 1) Clean 3.5 Gal Wash Bucket (Not one ya use to garden with)
- 2) Bucket Grit Guard (Chemical Guys DIRTTRAP02 [Amazon.com](http://Amazon.com))
