

# GoFAR USA TRT100 Electric Scooter

## HIGH QUALITY

Quality frame forged from aluminum alloy 6061 and durable high power hub-motor wheels.

## GREAT PERFORMANCE

Hit speeds of 35–40 mph, climb a 30 degree grade and feel the suspension on and off road.

## STRONG

With 2x1200 Watt hub-motors and a load capacity of 330lbs you can get some work done and have fun doing it.

## SUPPORT

At GoFAR USA Park we are here to provide any support or repair you may need. With our own fleet of these electric scooters ridden as rentals we know how to fix typical damage.
