# 20' HEATED STORAGE DELIVERED ACROSS CANADA

Purchase or Rental Options Available.

## Easy Tool Cribs

Making sure tools and supplies are secure is an obvious requirement for any job site. By modifying a storage container, the space becomes more functional. Your supplies will stay warm and added lighting make it easy to check out tools and keep them organized. Just add shelving.

## Add Your Own Lockers

By adding lockers and benches to your heated or lit storage unit, staff have a place for their belongings that can move as the job does. They'll spend less time traveling to and from a permanent structure, and they'll always have quick access to anything they need.

## Fast, Responsive Service

With over 25 locations across the country, we're committed to making your experience as effortless as possible. Our stores are backed by a Canadian support team, so you'll always have your needs addressed quickly. And if there's ever a problem, we'll fix it. It's that simple.

**Call to find out about availability and delivery timelines in your area!**
