Robert:

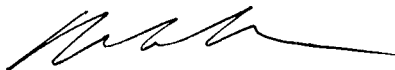

Thank you very much for the recent week-long instruction session. As you know, I recently purchased a Beechcraft Bonanza after I decided to return to flying after many years of absence. Your in air flight instruction sessions in my airplane were not only very informative, but also extremely helpful in restoring flight skills that had deteriorated with the passage of time. In addition, your ground school instruction and the reading assignments you gave me also restored much of my knowledge of VFR flight rules.

Also, we did have some time together, both on the ground and in the air for cross country instrument flight. Your command of the "knob-ology" of my aircraft's G600, G430, G530 and S-Tec autopilot was impressive and I have acquired new skills as a result of our training and instruction time together.

I look forward to spending additional training with you as I work towards my instrument rating.

I would highly recommend you to others needing ground or flight instruction.

Sincerely,

Mark Miller
