What a great experience!

I purchased a B36TC and needed help with a check-out. Through a search on the Bonanza Society website, I found Robert's contact information. Luckily, he was my first contact. We traveled to California to pick up the airplane and had a chance to visit about the airplane systems and performance. He went above and beyond by making a great laminated checklist from the POH procedures and brought other printed information to make sure I was aware of some potential safety concerns. He is very knowledgeable as a pilot as well as maintenance aspects. I learned several things about the Beech Bonanzas/Barons, and I've been flying them for almost 20 years.

To top it all off, Robert is a great guy and brings a good learning attitude without intimidation. After we returned, Robert ordered a replacement wing bolt cover for me and painted it to match my Bonanza with some extra Matterhorn White he had from a previous project.

I would definitely recommend Robert for any training you may need. I will not hesitate to call him for my future needs.
