

# National Quantum Literacy Conference 1.0

October 5-6, 2022  
Annapolis, MD

Jack C. Taylor Conference Center  
U.S. Naval Institute  
U.S. Naval Academy

**Education  
Inclusion  
Acceleration**

## Quantum Literacy in the Quantum Age

Quantum is the future and now is the time to get involved. Quantum Literacy is focused on diversity, equity and inclusion by making the basic understanding of quantum concepts and ideas accessible to all populations.

### Students & Faculty

Student high school competitions, with 150 high schoolers competing for prizes during and after conference.

### Government

Connect with government and DoD officials focused on quantum technologies.

### Industry

Best in class Industry professionals. Gather intel and information and explore collaborations.

The National Quantum Literacy Network (NQLN) team is working hard to show what a diverse, equitable and inclusive society should look like in the emerging quantum industries. Layer in the revolutionary power of new quantum technology, with its ability to soon disrupt existing business models, driven by new discoveries, markets and industries, and empowered by new competitors and adversaries, we find ourselves experiencing an awakening.

This awakening will be shown as a pivotal time in history where our industries embraced diversity, equity, and inclusion that goes far beyond just representation, but also, the experiencing of new thoughts and ideas from a diverse workforce development pool of workers.
