

## MEDIA KIT 2021

### IMAGES

- All images should have a minimum resolution of 300 dpi at 100%. Do not use LZW compression.
- All images should be converted to CMYK.
- All image files should be TIF, JPG or EPS. PICT and GIF files are low-resolution web files not suitable for printing.
- Do not copy and paste images from a program into a page layout program. Import or place the image through the page layout program.
- Make sure the file extensions remain intact on all files. If they are changed or omitted, they are unrecognizable when transferred.

### COLORS

- All art files should be converted to CMYK. We cannot guarantee color consistency for files that must be converted from Index, LAB or RGB color spaces to CMYK.

### FONTS

- Use only postscript, open type and true type fonts.
- Avoid system fonts.
- Be sure to supply the fonts for any artwork used in your document if they are not converted to outlines in the artwork.

### DOCUMENT

- Create your document to the exact size it will print.
- On full-page ads, bleeds must extend a minimum of 1/8" past the trim.
- On full-page ads, please allow an 1/4" margin from the trim for text and images. For a perfect-bound publication, please allow 1/2" margin from the trim on the sides.

### NATIVE FILE SUBMISSION

- When submitting native application files, please provide the native application file and all supporting image files and fonts used.
- Zip or stuff the document, all fonts and images used before submitting via e-mail or FTP. There is a higher risk of file corruption when files are not compressed before transfer.
