

# Breakthrough In Erectile Dysfunction Diagnosis & Treatment Process Restores Natural Healthy Function In As Few As Three Short Treatments...

**Safe - Proven - Non-Invasive - Long-Lasting – No Known Side Effects – No Pills Pumps or Needles – No Surgery So Effective Other ED Treatments May Become Obsolete - Now Available In Western PA**

## Great news for men who suffer with ED.

Advancements in both DIAGNOSIS and SOUND WAVE TECHNOLOGY have set a NEW GOLD STANDARD for treatment to reverse symptoms of erectile dysfunction.

The advanced treatment is doctor-administered. Safe. Effective. And involves no pills, pumps or surgery.

Unlike many treatments for ED, including old technology sound wave therapy, with the advanced diagnostic protocol, and advanced soundwave equipment and treatment protocol, all except the most extreme forms of erectile dysfunction are being reversed over a series of just a few short treatments.

Many report excellent results with as few as three treatments.

Dr. Ken Vinton, creator of the highly acclaimed Vinton Method™ For Restoring Healthy Sexual Function, calls the diagnostic and technology advances DISRUPTIVE TECHNOLOGY that will replace far less effective erectile dysfunction treatments such as pills, needles, pumps, implant surgery, and old-technology sound wave therapy.

According to Dr. Vinton DC, director of the multi-disciplinary Vinton Optimal Health Medical/Chiropractic Clinic in Western PA, *“This is as close to the Fountain of Youth for restoring healthy sexual function as you’ll ever come. With this process, virtually no man, regardless of age, has to suffer with ED.”*

Given the thoroughness of the exam, and new technology so advanced few doctors in America have it available in their clinic, once the exact cause(s) of the erectile dysfunction is determined, it is no wonder men describe the treatment as nothing short of miraculous.

## Men receiving these treatments are thrilled!

Fredrick R. reports, *“I’m 74 years old and had tried everything to get an erection. Nothing worked. I didn’t think anything could help me, until I tried this. Now I have the ability and the confidence to satisfy my wife in the bedroom. Thank you for giving me my sex life back!”*

Keith M., age 61 reports, *“I was embarrassed and ashamed as I lost my ability to get an erection. It was like a part of me had died. After four treatments with Dr. Vinton, things began to work. After six treatments, let’s just say I feel 20 years younger, and my wife and I couldn’t be happier!”*

## Symptoms of Erectile Dysfunction Include

Difficulty or inability to get or maintain an erection. Erections too soft to allow penetration. Reduced sensitivity resulting in less enjoyment.

90% of all ED is the result of poor circulation in veins and arteries supplying blood to the penis and/or reduced nerve response caused by the natural aging process, diabetes, or some form of vascular disease.

Without good blood flow and strong nerve response, it is near impossible to get or maintain an erection.

Environmental issues that may cause or contribute to ED include smoking, drug or alcohol abuse, and obesity.

If you suffer with ED, you may have got your hopes up many times, only to be disappointed when what you tired didn’t work.

Maybe you tried expensive ED drugs that failed you altogether or had side-effects you couldn’t tolerate like headaches, upset stomach, or just going to sleep waiting for the pill to work.

Maybe you tired herbal supplements that sounded great but did nothing, leaving you frustrated and your partner disappointed.

Maybe you tried injections or pumps that gave you more frustration than satisfaction, and were about as romantic as an angry porcupine.

Sadly, this is all too common. That is why it is important for you to know why the Vinton Method™ For Restoring Healthy Sexual Function is so different.

Dozens of studies published in European and U.S. medical journals, show good results for men with mild to moderately severe ED, cleared by a doctor for sound wave treatment.

**Now, with advanced technology, and the game-changing Vinton Method™ diagnostic / treatment protocols, success rates for reversing mild to moderate ED are near 100%.**

More impressive, if you suffer with extreme ED, (from long-standing diabetes, heart disease, cancer, or prostate problems), the documented success rate for sound wave treatment is near 70%. With the Vinton Method™ and advanced sound wave technology, that number soars even higher.

**So regardless of how severe your ED may be, YOU HAVE A PATH FORWARD - a path that is producing good results for men in similar situations right now.**

Dr. Vinton’s process is so effective it is setting new standards for the diagnosis and treatment of erectile dysfunction.

Men from 43 states and 11 countries have made their way to Western PA to be evaluated and treated by Dr. Ken Vinton. His clinic in Western PA has is a Mecca for men serious about regaining their sexual health, restoring sexual vitality, and reversing erectile dysfunction issues for the long term.

Dr. Vinton’s approach is so effective, doctors from around the country gather at his office several times a year to learn his powerful diagnostic and treatment methods first-hand so they can offer the same high-standard of care to their patients.

According to Dr. Vinton, *“Sexual health is about far more than getting and maintaining an erection. It is about your attitude. Your vitality. And your ability to enjoy life to the fullest.”*

## It’s not too late for excitement, romance and love!

*“At 81, a widower for five years and a survivor of prostate cancer, I thought my sex life was over for good. Then I met Chloe, a spry 75-year-old widow whose as pretty as rose. It’s funny how you meet somebody and start having thoughts you haven’t had for years. Problem was, my equipment didn’t work. I had read about Dr. Vinton in the newspaper and decided to call. I’m glad I did. Dr. Vinton did an exam. He figured out the problem. And about three weeks later, the night after my fifth treatment, Chloe and I sealed the deal. The next morning, about 2am, we decided we weren’t going to be widowed any longer. Life is good again! Thank you Dr. Vinton.”* Charles J.

## Frequent Sex Is Good For You

Frequent sex is a powerful health tonic. The health benefits, (as reported in major medical journals in the U.S. & Europe), are impressive.

*“Enjoying sex even a few times a week reduces the risk of heart disease, reduces depression, cuts the risk of colds and flu, provides better bladder control for women, and a much healthier prostrate for men.”* **BRITISH MEDICAL JOURNAL**

*“A little sex is good, and even more sex is better. Frequent weekly sex can reduce the chance of a heart attack by half.”* **AMERICAN JOURNAL OF CARDIOLOGY**

*“Regular sex reduces the risk of prostate cancer by a full third.”* **AMERICAN MEDICAL ASSOCIATION.**

Of course, you don’t need an expert to tell you sex is good. You just need a partner who wants to be with you as much as you want to be with them, and equipment that works.

The Vinton Method™ turns back the clock on ED. Dozens of studies report that frequent sex naturally increases testosterone levels, which naturally increase your desire to have more sex, which boosts your immune system, reduces your risk of heart disease, improves sleep, and makes everyday, a great day.

## Damage Caused By ED Is Real

The penis has two chambers that supply blood. If blood flow is blocked or restricted for any reason, you begin to lose your ability to get and maintain an erection, marking the beginning of the end for your sex life.

Without treatment, the vascular infrastructure of the penis begins to collapse. Veins and nerves shrivel up. The penis shrinks. And part of what makes a man a man, fades away.

## A Ticking Time Bomb That Can Rip Emotions To Shreds & Make A Strong Man Cry...

Besides increasing the risk of serious health problems, erectile dysfunction can wreck your confidence. Destroy your ego. Damage your marriage. Or threaten your relationship.

ED robs you of the joy of pleasuring a woman. And if someone you care about longs for that pleasure, and you can’t provide it, she suffers in silence, while you feel less of a man.

Not enjoying romance, intimacy, or just plain old sex whenever the mood strikes is depressing. And somehow, it makes life seem just a little less worth living. You deserve better.

## Common ED Treatments Create More Problems Than They Solve...

**PILLS** - Commercials with an attractive woman smiling at a grinning man, fail to mention the common side effects of popular ED drugs, (*like headaches, stuffy nose, heartburn, distorted vision, and shortness of breath*), are so debilitating, only about 30% who try these drugs can tolerate them. They also fail to mention prescription drugs like Viagra, Cialis and Levitra, can cost up to \$400 to over \$700 a month.

**NEEDLE TREATMENT** – Stabbing your penis with a needle every time you want to enjoy sex can kill nerves, damage tissue, reduce sensitivity, and may lead to Peyronie’s Disease, which is a painful condition that makes it impossible to have sex.

**PUMPS** – Pumps are expensive, dangerous, and may cause serious injury if it malfunctions. And like pills and needles, the pump is a momentary fix to a problem you want gone forever.

**IMPLANT SURGERY** – The percentage of botched implant surgeries that make it impossible to experience an erection ever again is so high, you may decide to join a monastery before submitting to the surgery.

## The Superior Solution

Compared to **The Vinton Method™ with Advanced Sound Wave Treatment**, other ED treatments are like Band-Aids that keeps falling off. They do little good.

The **Vinton Method™** is different, because the Vinton Method™ identifies the ROOT CAUSE of erectile dysfunction and solves the problem on that level.

**Popular ED treatments that fail to produce good and lasting results, fail in large part, because of incomplete diagnosis.**

Unless you identify the ROOT CAUSE or CAUSES of the problem and treat on that level, all you can do is treat symptoms. And all you get is, at best, a short-term solution.

But you want a LONG-TERM solution that lets you enjoy sex whenever you want. Not a short-term fix that takes an hour to prepare for and may give you a headache or upset stomach before you nod off waiting for it to work.

## How Advanced Sound Wave Treatment Works & Why It Works So Well...

Like lithotripsy dissolves kidney stones, advanced sound wave treatment for restoring blood flow to the penis is a precise science that requires equipment far different from what you find in any typical ED clinic, and in most doctor’s offices.

**Having the right equipment is critical. Without it, your odds of success plummet and results may be disappointing at best.**

On your first visit the Vinton Clinic, you get a complete evaluation to determine why you can’t get an erection. Why the erection doesn’t last. Or why it is too soft to allow penetration.

Erectile dysfunction may result from multiple factors, including metabolic, neurologic, arterial, venus and more. The diagnosis will determine the exact cause(s). The recommend treatment plan is based on the findings. Reduced blood flow to the peins is often found to be a major contributing factor.

During the exam, the doctor performs a painless Doppler Ultrasound test to determine if veins or arteries supplying blood to the penis are blocked, and to what extent.

If a blockage is present, and you are cleared for advanced sound wave treatment, the doctor will explain everything and plot out a treatment plan. Treatment is fast and painless.

Using a handheld device, the technician focuses the sound waves on veins and arteries with obstructed blood flow. The waves, (calibrated to the exact right depth determined by the ultrasound), move through the tissue, and gently dissolve plaque that restricts blood flow to the penis.

**The treatment takes about 20 minutes, has no known side-effects and requires no recovery time.**

If you suffer with mild ED, you may experience an erection ridged enough to enjoy sex with as few as one or two treatments. However, most require 3 to 6 treatments to be able to enjoy a spontaneous erection anytime.\*

Dissolving plaque that obstructs blood flow, 1) ACTIVATES STEM CELLS that cause veins to regenerate and new blood vessels (that increase girth) to grow. And 2) promotes new nerve growth that makes maintaining an erection easy, and results in greater sensitivity and more explosive orgasms.

**Once function is restored, it may last for years with no additional treatment.**

The Vinton Method™ With Advanced Technology Sound Wave Equipment Is the New Gold Standard for treating ED.

Advanced sound wave equipment, the kind used in medical studies, cost upwards of \$75,000, which is why few doctors in America have it available in their office.

Even with accurate diagnosis, choosing the wrong provider and being treated with old-technology equipment may result in disappointment, or outright failure, instead success.

## Return to Younger Days

The Vinton Method™, with Advanced Sound Wave Treatment, prompts your body to rebuild the vascular infrastructure in your penis. And restore blood-flow and nerve response similar to what you experienced years ago, when you could get an erection if the wind blew.

**It’s like a return to youth. Your attitude changes. You feel younger and more vibrant. Most experience a huge boost in the strength of their erections in just three to five treatments and are able to enjoy prolonged sexual activity.**

That explains why reports like this are so common.

*“I’m not one to talk about my personal life. But this treatment is amazing. I’m going to tell all my friends about it. Visiting your clinic is the best choice I’ve ever made. I only wish I had known about it years ago!”* Collin M. Age 57

## MEN LOVE THIS TREATMENT BECAUSE IT WORKS.\*

*When my prostate was removed, I thought my sex life was over: I am 74 and have not been able to get and maintain an erection for 12 years. Other treatments were not safe for me because of my medications. I had seen two doctors about my ED and neither of them could help. I didn’t think anyone could help me. I was nervous, embarrassed and skeptical. But the treatment worked! My wife and I hadn’t had sex for ages, and now we can. Thanks for giving me my sex life back!* Gerald F. Age 74

*It’s been 9 years since I was able to get and maintain and erection. I couldn’t take Viagra because I couldn’t stand the side effects and the doctor said other treatments were not safe for me because of medications I take. I heard about Dr. Vinton and the advanced sound wave treatment, I decided to give it a try and I’m glad I did. Your staff was friendly and respectful. I was never uncomfortable or embarrassed. Thank you for giving me my sex life back.* J.K. Age 62

*“One treatment and I had sex with wife three times! This is better than I expected.”* Richard M.

*“Four treatments, first erection in 5 1/2 years, very emotionally rewarding.”* James V. Age 83

## What About Price?

The only way to determine the price is to visit the Clinic and meet with the doctor. But this is certain, if you want to be sexually active, Dr. Vinton’s program may save you a fortune compared to the cost of popular prescription ED drugs.

## You Suffered Long Enough

The facts speak for themselves. You don’t have to live with the indignity of ED any longer. Now you have a choice.

## Now You Stand At A Crossroads

Go one way and nothing changes, until things get worse and the pills stop working, or needle injections or pumps damage your penis to such an extent you can’t feel a thing and will never have another erection again.

Go the other way - the Dr. Vinton way - and you open the door to having a firm erection whenever the mood strikes and being able to enjoy sex once again. If that’s what you want, this may be the answer you’ve been hoping for.

## Don’t Let ED Stand In Your Way Another Day

Fun, play, intimacy, a stronger relationship, and sex any time you like, without pills, needles, pumps or surgery, may be yours for the asking. All it takes to get started is a phone call.

## Your Next Step

Your next step couldn’t be easier!

Just pick up the phone and call 800-996-0382 anytime 24 hours a day. Leave your contact information, and, for a limited time, Dr. Vinton himself will call you back after clinic hours.

## This Is Your Opportunity To Have A FREE TELEPHONE CONSULTATION With Dr. Ken Vinton

Dr. Vinton recognizes this may be a sensitive subject. That is why he is willing to speak with you in the privacy of your own home, on the telephone.

Dr. Vinton will answer your questions. And ask a few to determine if you are a good candidate to benefit from his unique diagnostic and treatment process. If at the end of the call you want to meet with Dr. Vinton for a complete diagnostic exam, he will provide details and have the office contact you to schedule a time.

*It’s that simple. The call is absolutely free.*
