The Theban Alphabet shows up in magical texts about 1500 CE. It has 1:1 correspondence with Latin letters which is why it is believed to be a magical cipher. Use it as a tool for concentration, magical intention, and connection. The last mark is reported to be 1:1 with a period or "." but this is not always the case. This symbol is used only in modern versions of Theban. I use this mark at the end of a spell, not the end of a sentence.
