

THE CASTLE COLLECTION

High performance Composite doors

Creating grand entrances for beautiful homes

*Eilean Donan castle on a cloudy day
Highlands, Scotland, UK*

A beautiful entrance to your home will make a strong statement about your individual taste and set the tone for the rest of your property. Whether warm and welcoming or stylish and modern, the right door will transform your home and add instant kerb appeal.

A new door from the Castle Collection creates an instant and memorable impression as visitors enter your home, while you benefit from lower energy bills and enhanced security for complete peace of mind. When you choose to invest in replacement doors, make sure you choose a Castle Collection door.

What our customers say:

Mr & Mrs Williams

"We still can't believe the difference our door has made to our home. It looks beautiful and really stands out from the others in our neighbourhood"

Mr Archer

"The fact that I will never have to paint it and yet it will still look good for years was one of the main reasons I chose my new composite door."

Miss Ballinger

"My door has the traditional look of wood, but it's maintenance free and packed full of the security features I wanted."

John & Sadie Marsh

"We couldn't be happier with our new composite front door. The colour is amazing and it feels really sturdy compared to our old door."

Doors you'll want to come home to

Enhance the beauty of your home with an exterior door that combines the aesthetics of timber with all the benefits of modern materials. Great long-lasting looks and a reassuring 'clunk' when you close the door tells you immediately that not all doors are the same.

Made with you in mind

Made from glass reinforced polymer (GRP), our composite doors provide class-leading security and insulation standards, in a made-to-measure package that's virtually maintenance-free and as tough as nails.

With a vast range of styles, glazing options and design details to choose from, you can personalise your door completely - and once fitted, it will look sensational for years to come.

Good looks that last mean composite doors require no rubbing down, painting or varnishing and they won't swell, warp or rot, whatever the weather. They're also highly resistant to dents and scratches, so they'll look every bit as good in 5 or even 10 years' time.

Door construction

Make sure you're safe and secure

We want you to relax in the knowledge that choosing our composite doors means you have specified the best security possible for your home.

The reassuring 'clunk' when you shut the door tells you we mean business. Our Kitemarked hardware assures quality and a testing regime that simulates all forms of attack, including methods such as crow bar, sledge hammer and credit card, and guarantees deterrent over many years to come. Multipoint hooked door locks secure the door firmly and fast - top, middle and bottom - and specialist anti-bump cylinders will put off even the most determined unwelcome visitor to your home.

Tested to comply with the Security Standard PAS 24, the security we provide is positively recognised by leading British insurance companies.

Fire door

Fire Doors

Our fire doors carry the same aesthetics and high performance as our standard product range, but are manufactured to fully comply with Building Regulations and have been independently tested in accordance with BS 476 , Part 22, for a 30 minute fire rating.

Designed for your property

Our fire doors have been designed for all types of properties, whether they are flats, shared entrances, or multiple entrance homes where building regulations stipulate that fire rated doorsets are required.

Some key benefits include

- ✓ Virtually maintenance free and long lasting.
- ✓ Made from UV colour stable GRP that will not crack, fade, peel or ake.
- ✓ Resistant to warping, twisting or bowing and will not dent.
3 Secure and durable.
- ✓ 10-year guarantee.

External Door Colour (white inside)

Specifications

Door Handles

All are available in lever/lever or lever pad. Our products are subject to continuous improvement and occasionally we may need to change hardware specification without prior notification. This will not affect the overall door specification.

Anti-Bump Cylinder

Fitted as standard, this anti manipulation cylinders available in Brass or Nickel. To accompany this, a cylinder guard is used to prevent any unauthorised removal or snapping.

*Additional Information**

Letterbox positions are shown for decorative purposes only – actual letterbox positions need to be confirmed upon order.

All doors shown as external view.

*Colour options available for this type of glass. Actual aperture positioning may differ from images shown in the brochure.

Hardware

Choose a door that's as individual as you are

With our composite doors comes the opportunity to customize your door to exactly the style you want through the specification of hardware.

From spy holes to hinges, letter plates to numerals and let's not forget the knockers - we offer a chance for you to truly personalize your new door.

Glass adds personality to your door whilst colour, style and finish ensure the ability to complement and enhance any house. With 168 options on style and finish and hundreds more hardware and glass combinations we're confident you'll find the door you want.

Environment

Doing your bit for the environment - and your pocket

We're sure our composite door is a product you'll warm to, especially as it provides up to six times more thermal insulation than a traditional timber door.

Independent testing shows you can expect a composite door to last for up to 35 years – typically longer than any other type of external entrance door with significantly lower maintenance costs than more traditional solutions.

Door Type	Expected Life (Years)	Maintenance
Softwood Door	25	Paint, 5 Years
Hardwood Door	35	Paint, 5 Years
Steel Composite Door	30	Wipe Clean
PVC Composite Door	25	Wipe Clean
GRP Composite Door	35	Wipe Clean
PVC Panel Door	20	Wipe Clean
