OGDEN WEBER TECHNICAL COLLEGE
ELECTRICAL PROGRAM RELOCATION
DIVISIONS 26, 27, AND 28
2/18/2022

1. EL201 key note 9 states to integrate new switches into existing lighting control system. The note applies to a new switch serving the existing corridor adjacent to Storage 102. The intent of this note is for the new line-voltage, 3-way switch shown to be integrated into the existing switching system for the corridor and not to integrate it into a network lighting control system.
2. Prior approvals for select fixtures have been given to Steven Sales and Rocky Mountain Lighting and Controls. Complete list is not given here, but can be verified with the fixture reps.
