Instantly Increase Revenue

Algorithmically calculated upsells recommend targeted products to increase average ticket size by 18.5%

Decrease Labor Costs

Replacing a cashier position with the Samsung Kiosk can save your business over \$6,700/month

Improve Customer Experience

Customers have total autonomy over selecting, customizing, and updating their order throughout the transaction

The Proof is in the Data

Almost immediately, GRUBBRR has transformed the way customers order at BurgerFi. Customers now have an option to place their orders seamlessly without interacting with cashiers using GRUBBRR technology, and this has freed up cashiers who can be reallocated to food production or to enhance the customer service experience.

18.5%

increase in average ticket size

70%

of customers prefer to order via kiosk

52%

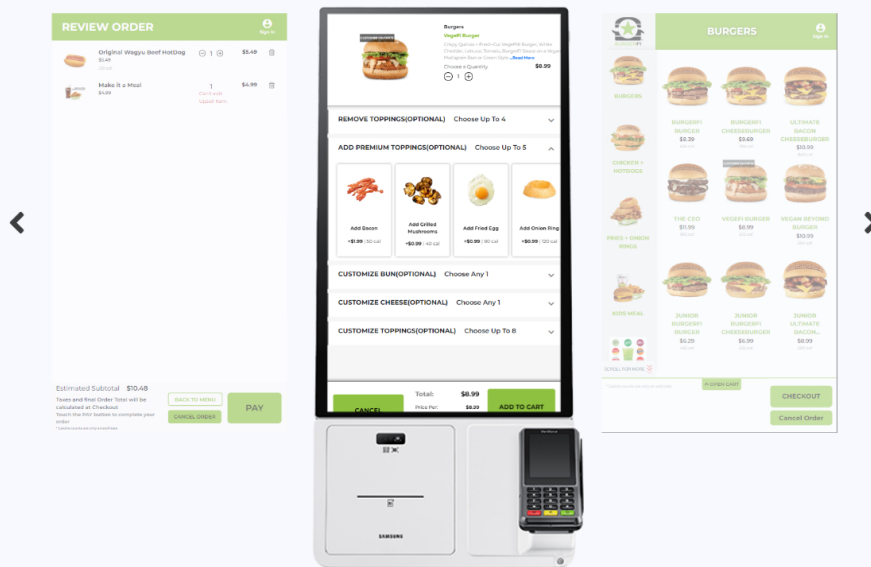

of customers choose an upsell

High-Impact Menus that Entice Customers

GRUBBRR's award-winning platform uses high-resolution menu images and intuitive design to make ordering fast and easy.

"From an operator perspective, we like the upsell features of the kiosk. From a technology perspective, we like the ability to offer our entire menu, have real-time 86'ing tied into the POS, and enterprise control of multiple units."

Karl Goodhew
CTO - BurgerFi

Designed and Developed for BurgerFi

At BurgerFi, the Samsung Kiosk powered by GRUBBRR integrates seamlessly into the POS system, thereby enabling data flow through existing integrations such as the BI tool and POS reporting. BurgerFi franchisees can then use the reporting features from the enterprise portal to tie the performance against set KPIs and benchmarks for success.
