

JOB TITLE: Vibration Analyst

SUMMARY

This role is responsible for completing predictive maintenance services and providing comprehensive reports of findings. This includes testing rotating equipment at the customer's site using vibration analysis equipment; measuring the severity of equipment problems and reporting conditions to the customer; and performing repairs such as laser alignment, balancing, bearing installation, troubleshooting, and general industrial mechanical repairs.

ESSENTIAL DUTIES & RESPONSIBILITIES

- Collect and analyze vibration data for electric motors and other industrial equipment
- Determine equipment faults and fault severity
- Verify repairs and collect baseline vibration data
- Investigate equipment failures

QUALIFICATIONS & REQUIREMENTS

- High School Diploma or GED equivalent
- 2+ years' experience as a Vibration Analyst
- Vibration Certification: ASNT Level I / ISO Category II or higher
- Valid Drivers License
