

Novice Project Condom Roses September 2019 – On going

Nv Sister Ursula Morecock had the idea of handing out condoms with a twist. The Emerald City Sisters gets condoms from Wichita's Positive Directions, a HIV/AIDS outreach organization. Positive Direction has condom distribution boxes though out Wichita and the surrounding central Kansas area. With a little craftiness the condoms are formed into a "rose". Each rose includes a condom and a packet of lube. A condom and a lube and taped to a bamboo skewer and then covered with green floral tape to give the appearance of a beautiful, yet useful flower. Everyone feels good when they are given flowers.

We first gave out condom roses at Wichita's AIDS Walk. And they were a hit. Since then all the members of the house have learned how to construct a condom rose and we take them with us every time we go out for ministry.
