

NORTH STAR CASE STUDY

 North Star House, Swindon

THE PROJECT

A conversion of the old BT building in Swindon into 286 luxury apartments across 4 connecting buildings.

OUR SCOPE

The design, supply & installation of windows, doors & associated products.

KEY NOTES

We secured the contract for the full glazing scope, providing specialist acoustic glass and trickle vents, critical for mitigating high noise levels from the neighbouring Swindon train station.

OUR SOLUTION

- 3,400m² of Rehau TOTAL70 windows & doors
- Acoustic glazing & vents
- Crucial repairs to existing curtain wall
- AluK 58BW opening casements into curtain wall
- AluK thermally broken communal entrance doors & screens
- Automatic opening vents (AOV's) - Certified to EN12101-2
- A2 non-combustible panels

THE RESULT

The installation was successfully completed by our teams in approximately 26 weeks. The TOTAL70 frames delivered proven results: the highest BSI performance standards, guaranteed A+ WER for energy efficiency, critical noise mitigation near Swindon train station, and robust PAS24 security.
