Bachelor of Sci, Project Management Technology 2014	**Federal University of Technology, Akure, Nigeria 2008 -**	

PROFESSIONAL EXPERIENCE

Installation Project Manager, LOWES, Indianapolis, IN, USA   **09/2019 – Present**
Lowes is one of the largest home improvement Company that specializes in helping homeowners, renters and Pros improve their homes and businesses.

- Effectively lead a cross-functional team of 16 employees, fabricators, installers, and other sub-contractors to successfully deliver complex home improvement projects. (>$200K)
- Manage multiple projects (average of 10) simultaneously while providing project management expertise in planning, execution, monitoring and controlling, and hands-offs to ensure project is delivered within scope, on time and on budget.
- Oversaw integration of external technology solutions by leading 4 developers and 8 testers from two companies, resulting in an additional $1MM of sales.
- Facilitated test driven development on all projects, increasing quality by 15%; ensured improvements based off customer feedback.
- Consistently achieved 100% on time and on budget delivery while managing multiple projects (average of 5) simultaneously from initiation to customer hand-off, and ensured that work performed was safe, high quality, within scope and cost effective.
- Determined the roadmap and partnered with teams to deliver quality and up to date user experiences.

- Implemented Agile mindset by conducting burndown chart, velocity, and task breakdown to reduce release time from >60 days to <30 days leading to more agile releases.
- Collaborated with members of Dev-Ops team and Aws Azure Was used by the Dev-Ops team in Creating code branches, linking project tasks to code branches, pulling, and pushing code to/from the cloud, and merging code branches when work is complete.

- Facilitated customer and vendor kick-off and update meetings to ensure accurate understanding of scope, contracts, requirements, and deliverables

Project Manager/Scrum Master, ENERGERIA, USA and Nigeria   02/2016 – 08/2019
Energeria is an engineering servicing firm that provides oilfield services and equipment to the upstream and mid-stream petroleum industry.

- Managed project scope and supervised the activities of a 30-member team and implemented costing down initiatives resulting in annual savings more than $1.2M.
- Superheaded a major pricing restructure by redirecting focus on consumer willingness to pay instead of product cost; implemented a three-tiered pricing model which increased average sale by %45 and margin %13
- Led the transition to a paperless practice by implementing an electronic system of monitoring tasks and deliverables which reduced cost of labor by %30 and company overhead by $10.
- Maximizes capabilities through evaluation, simulation, and execution of action plans with improvement and lean manufacturing principles increasing productivity by 35%, which further increased the team's performance by 50%.
- Facilitated sprint planning, daily scrum, retrospective and sprint demos.
- Maintained relevant metrics like sprint burndown charts, epic and release burndown charts and velocity that helped the team see how they are doing.
- Employed servant leadership tactics to help the team self-organize and build confidence among team members.
- Introduced control chart as an Agile metric to improve the team's processes by allowing them to adjust immediately.

Project Engineer, ALMOUR ALUMINUM SYSTEMS, Nigeria   10/2014 – 01/2016
Almour aluminum is one of the fastest growing aluminum company that facilitates, produce and supply standard-grade, high purity and value-added aluminum products.

- Identified plans and resources required to meet project goals and objectives by setting realistic timelines and checkpoints.
- Implemented a structured data representation of the dataset used in PowerBI using SQL to ensure reusability by the product team.
- Increased brand recognition by over 50% from the Q1 to Q3 of FY3 by developing marketing and sales communication strategies and creating strategic alliances in new markets.
- Developed proposals, negotiated terms and conditions, and implemented contractual agreements with accountability for delivering strong financial results.
- Implemented cross-functional team structure and limited it to 10 people with varied skills. For easy communication and interaction.
- Architected roadmap for Managed File Transfer, Product Compliance and Key Development System.
- Budgeted effectively, saving over $5,000 in monthly operation costs.
- Developed project plans and managed project scope using waterfall methodologies to guide project from conceptualization to implementation and maintenance.
- Monitored assigned activities on Microsoft project software to align with data and daily targets; reported discrepancies to senior management
