

READY TO DEFY GRAVITY?

The Zero-G Experience, Puerto Rico

For The First Time in Latin America & The Caribbean!

Rafael Hernandez International Airport, Aguadilla

December 2023

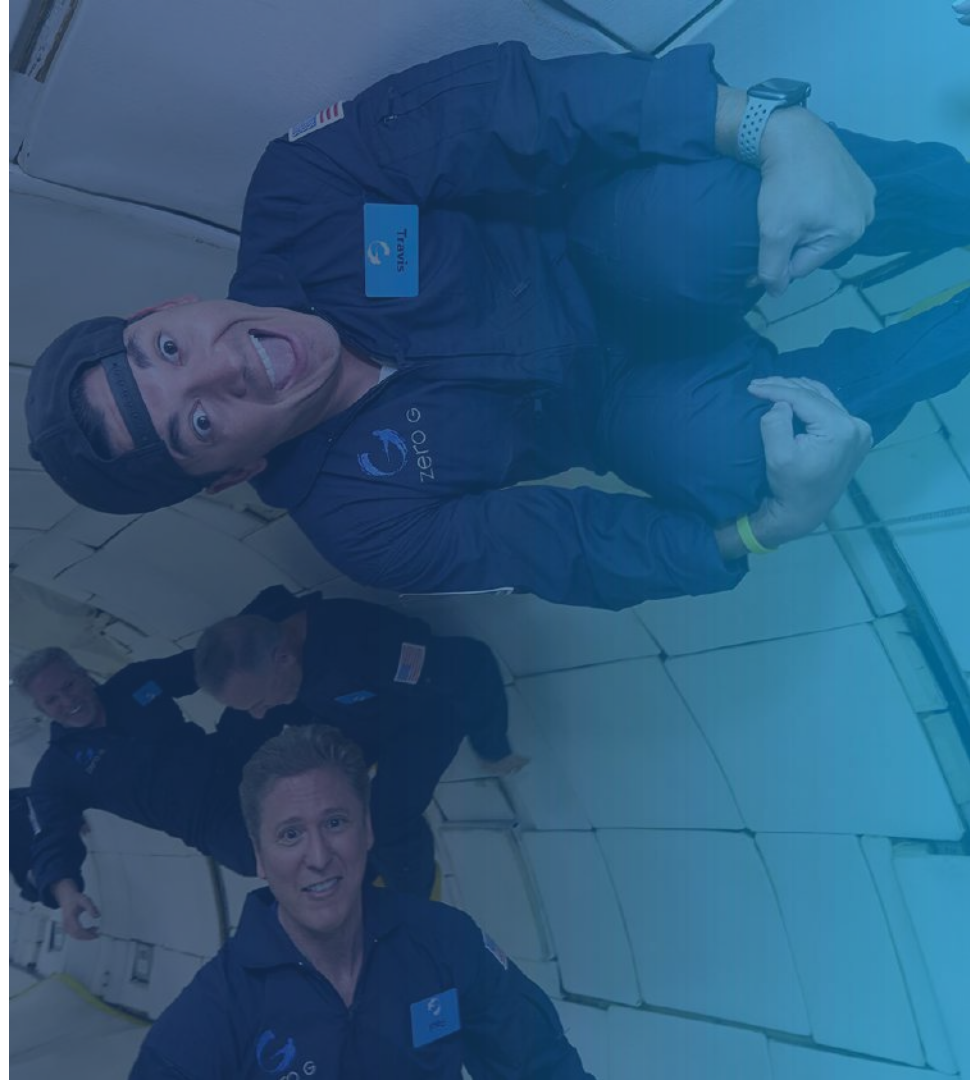

If you've ever wondered what it would be like to be in space, this is your opportunity!

What Is Zero-G?

Zero Gravity Corporation is a privately owned space tourism company that focuses on making the space experience accessible to the general public. Its offerings include the chance to experience true "weightlessness" in a parabolic flight without actually traveling to space.

The co-founders of the company, Dr. Peter H. Diamandis, Dr. Byron K. Lichtenberg (a veteran astronaut), and Ray Cronise (a NASA engineer), secured FAA approval for the use of a specially modified Boeing 727-200 named G-FORCE ONE for commercial parabolic flights to simulate weightlessness for entertainment, educational and research purposes.

The Experience

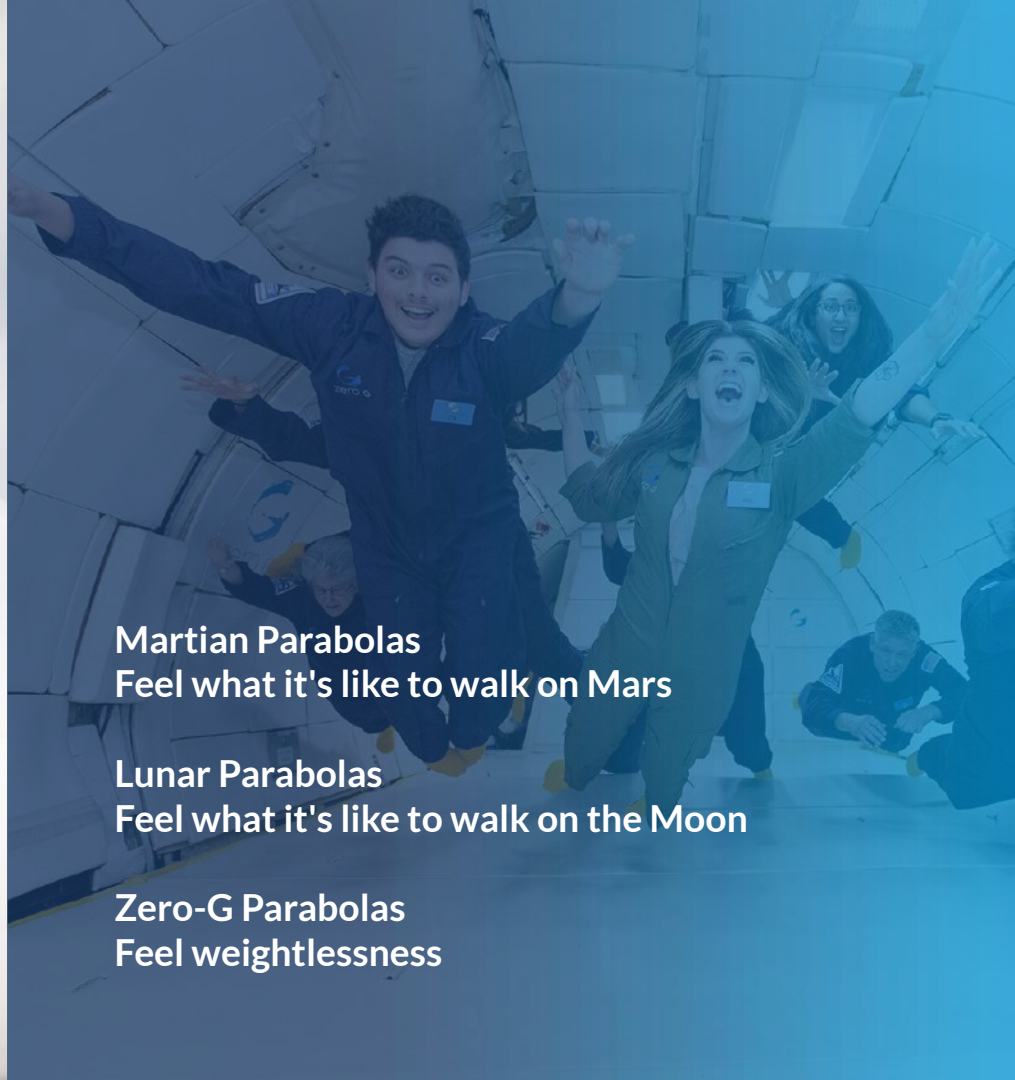

The Zero-G Experience® Puerto Rico is a one-of-a-kind opportunity to experience true weightlessness without going to space!

Flying On Our Specially Modified Boeing 727, You'll Experience A Weightless Environment That Allows You To Have The Feeling Of Being In Space Without Leaving Earth.

Only A Fraction Of Humanity Has Ever Experienced Zero Gravity. Let's Change That.

G-Force One

G-FORCE ONE® aircraft is a Boeing 727 that has been adapted to provide an unique experience. It creates weightlessness by performing aerobatic maneuvers called parabolas. These maneuvers are executed by specially trained pilots and are not simulated in any way, providing passengers with a true weightless experience. To learn more about the process, click this link to watch the [video](#).

First Steps Into Space

Our mission is to establish Puerto Rico as the leading Space Hub in the Caribbean and Latin America, building on its strong track record of excellence in the industry. The recent launch of PR-CUNAR, the first satellite built and launched by Puerto Rican students, highlights the island's growing role in the space sector. It is our goal to provide the talented students and mentors involved in this project, as well as other STEM students, with the opportunity to experience microgravity and weightlessness locally, offering exceptional educational prospects.

By sponsoring and supporting the ZERO-G EXPERIENCE, you can help elevate Puerto Rico's profile in the rapidly expanding Space Economy and position the island to become a major player in the industry.

It would be an honor to have your support to bring this highly sought-after earth-based space experience to Puerto Rico and, together, make history.

Join Us In Making History By Supporting The Zero-G Experience, Puerto Rico!

On December 2023, the Rafael Hernandez International Airport in Aguadilla will be transformed into an unforgettable adventure that will inspire the next generation of Aerospace and Aeronautics leaders.

By partnering with us, you will help create pathways to future educational, scientific, and touristic opportunities for the island of Puerto Rico. Your support will also benefit your company by increasing awareness among the local public and showcasing your commitment to innovation.

Thank you for considering our proposal and we look forward to partnering with you!
