We are Hiring!

Job description - Sheet Metal Worker

As a Sheet Metal Worker with Windfields Mechanical, you will be part of a highly skilled and valued team. We are a privately owned and operated company specializing in the design, supply, installation, and service of welding fume exhaust extraction systems, vehicle exhaust extraction systems, general and central ventilation systems, and industrial ductwork (US Duct). We take pride in delivering quality workmanship and exceptional customer service. In this role, you will be responsible for the installation, service, and after-sales support of ventilation and extraction systems, including component replacements and repairs. You will apply your technical and mathematical skills when operating tools and machinery, interpreting blueprints, and completing precision installations. This position is ideal for individuals seeking growth opportunities within a rapidly expanding company that values hard work and career development.

Key Responsibilities

- Assemble and install welding fume exhaust systems, vehicle exhaust extraction systems, ductwork, ventilation components, and air cleaners
- Install general and central ventilation systems according to project specifications
- Service, repair, and replace system components and parts as required
- Interpret and work from architectural drawings, mechanical layouts, and specifications
- Measure, cut, and fabricate sheet metal products for installation
- Perform ductwork installation, repair, maintenance, and service—individually and as part of a team
- Maintain a safe work environment while following company safety procedures
- Operate and maintain company-issued tools and equipment in a professional manner
- Follow Windfields Mechanical policies and procedures on job sites

Qualifications

The ideal candidate will:

- Have at least 1–2 years of sheet metal or ventilation installation experience (commercial/industrial experience is an asset)
- Hold a valid Sheet Metal Worker license with the Ontario College of Trades as an asset.
- Possess a valid G driver's license with a clean abstract
- Have current safety certifications: Elevated Work Platform, Working at Heights, WHMIS, and 4-Step Training
- Be able to work independently as well as part of a team
- Bring a strong work ethic, positive attitude, and attention to detail
- Have excellent problem-solving and communication skills
- Represent the company professionally with clients and contractors

Compensation & Benefits

- Competitive wages based on experience and qualifications
- Opportunities for advancement within a growing company

 **To Apply:** Please submit your application to operations@windfieldsmechanical.ca
