

We can't alert you if we can't reach you.

Help & Answers

Lake County Emergency Alerts

Get emergency and urgent notices by signing up for our "Lake County Emergency Alerts." This allows us to reach you quickly with critical information like evacuations, shelter-in-place warnings, road closures, law enforcement safety messages, etc.

You can receive these messages for multiple locations (home, work, cabin, childcare, etc) and by whatever methods you choose (voice, emails and text). For text messages, please add 893-61 to your caller ID to identify these alerts.

If you were previously registered for emergency notifications through CodeRED, you need to re-register for Lake County Emergency Alerts. Lake County will no longer use CodeRED after February 28, 2019.

Lake County respects your privacy. Your personal information will not be shared, except as required by law, and will only be used to send urgent messages from Lake County Sheriff or Emergency Management.

"You pick where, you pick how."
