

SVG-500 is designed for conducting all types of combat operations and reconnaissance tasks, both in the field and in urban conditions, with the possibility of penetration into buildings. It doesn't carry cargo. However, it can tow a trailer of up to 400 kg of weight. This Unmanned Ground Tracked Vehicle is fully Electric, which results in very low noise emission and low infrared signature. And the range can be increased by swapping battery which takes less than a minute.

SVG-500

TECHINICAL DATA

Dimension	1.44 (L) X 0.68 (B) X 1.35 (H) Mtr.
Weight	450 kg.
Motor	Electric 2 x 15kW
Maximum speed	30 km/hr.
Operation Range	40 km
Remote Control Distance	Up to 10 km.
Video Image transmission	Digital, High Definition
Armament	Machine Gun 7.62 mm)
	Grenade Launcher
