We have over 25 years' experience delivering quality plumbing products to the UK market at competitive prices, quality is our main goal, we want to give you the best possible products at a competitive price.

The use of Press Fittings has grown over recent years and we are committed to offering you the installer the best price, great stocks and next day delivery.

Press Fittings should obviously save you time but not cost you the job, we have teamed up with some amazing suppliers to offer great products including the Z-Press machines, Novopress & Aquagas.

We also stock gas approved fittings, Full bore lever valves, screwdriver valves, male iron & female iron fittings, wall plate elbows plus a range of V profile copper and a range of Stainless Steel.

A new MLCP offering has been added and we are pleased to be teaming up with a leading quality brand – Multipipe.

WRAS approved, CE marked, Gas Approved, 20-year Warranty, Next Day Delivery and Amazing Prices!

Order online, Call or e-mail us.

Pressing Unit ACO103

-  Metal up to 35 mm
Plastic up to 40 mm
-  One-Hand-Operation
-  Rotatable head
-  Illumination of the press area
-  Data transfer via Bluetooth®

Compact and high-performance efficiency

- **NEW**
with rotatable head
- Powerful Milwaukee® Lithium-Ion 18V batteries for reliable performance
- Redundant switch-off and press force control with LED indication
- Automatic pressing cycle
- Safe handling with slipproof rubberized housing and ergonomic design
- Illumination of the press area for safe working
- Analysis of the pressing tool performance via NovoCheck app

Press jaw PB1

Pressing Unit ACO203

powered by Brushless Motor Technology

Illumination of the press area

Metal up to 54 mm (M-Contour)
up to 108 mm (V-Contour)
Plastic up to 110 mm

Low weight

Small tool dimensions

Data transfer via Bluetooth®

Fit for the future with the new tool generation

- Light-weight and handy
- Up to 40 % more pressings per battery charge*
- Illumination of the press area for safe working
- Reduced need for maintenance due to new motor technology
- Maintenance interval of 2 years - without limited numbers of press cycles
- Analysis of the pressing tool performance via NovoCheck app

Compatible press jaws and collars

* in comparison to its predecessor ACO202

Pressing Unit ACO203XL

powered by Brushless Motor Technology

-  Metal systems up to 108 mm
Plastic systems up to 110 mm
-  40 % more pressings
per battery charge*
-  Status indication
with LED display
-  Rotatable head
-  Data transfer
via Bluetooth®

**The all-round talent
even for big dimensions
up to 108 mm**

- Light-weight and handy
- 12 - 108 mm with only one tool
(all materials)
- 40 % more pressings per battery charge*
- Rotatable head
- Back stroke limitation - faster pressings
with compatible jaws by an adaptable
piston stroke
- Reduced need for maintenance due to
new motor technology
- Analysis of the pressing tool performance
via NovoCheck app

Adaptor jaws
ZB221 and ZB222

novopress
because quality matters

* in comparison to its predecessor ACO202XL

PZ-1930

BATTERY POWERED PRESS TOOL precise pressing with lighter body

- 15-28mm Stainless steel pipe
- 15-35mm(1/2"-1 3/8") Copper pipe
- 16-40mm PEX&Multi-layer pipe

The PZ-1930 is the newest addition to the mini press tool with in-line grip, it is efficient and reliable way to join copper, stainless steel and PEX&Multi-layer Pipe.

COPPER PIPE

MULTI-LAYER COMPOSITE PIPE

PEX PIPE

STAINLESS STEEL PIPE

2.4s
PER CYCLE TIME

All tools can be controlled by one trigger

Anti-slip handle

180° rotating head

Manual Retract

OLED display

High Performance
18V Li-ion Battery

SPECIFICATIONS

Capacity:	15-28mm Stainless steel pipe	Battery:	18V Li-ion 2.0Ah
	15-35mm(1/2"-1 3/8") Copper pipe	Battery Charger:	AC 100V-240V 50-60Hz
	16-40mm PEX&Multi-layer pipe	Charging Time:	Approx. 40mins
Output:	19kN	Service Interval:	10000cycles
Stroke:	30mm	Weight:	Approx.2.0kgs (tool with battery)
Oil capacity:	Approx. 60ml		Approx. 3.6kgs(tool with battery and jaw)
Crimping Cycle Time:	2-4s	Tool Size:	Tool Size: 363×119×75mm
Crimping Cycles/charge:	180cycles (DN 20 Stainless Steel)		
MODEL NO.	DESCRIPTION	Weight (KGS)	Standard Pack
PZ-1930	PZ-1930 Battery Press Tool Kit without jaws	4.5	1set
ACCESSORIES	18V, 2.0 Ah Li-Ion Batteries	0.3	2pcs
	Charger	0.5	1pc
	Plastic case	1.7	1pc
	Sealing ring of cylinder:		1set
	Sealing ring of safety valve:		1set

PZ-1550

BATTERY POWERED PRESS TOOL

Efficiency and Durability

- Battery press tool with in-line grip.
- SPEED UP 20% compare with old type.
Only 3-4.5S to finish one cycle press
- The tool comes standard with two 18V,4.0Ah Lion-batteries and one charger. It can achieve over 350 cycles per charger.
- Motor drivers, Micro-computer control system, OLED screen and double valve hydraulic system.

High Performance 18V Li-ion Battery

SPECIFICATIONS

Capacity:	15-54mm stainless steel pipe ,	Battery:	18V Li-ion 4.0Ah
	15-108mm PEX, multilayer pipe and copper pipe	Battery Charger:	AC 100-240V
Output:	32kN	Charging Time:	Approx. 80mins
Stroke:	40mm	Service Interval:	10000cycles
Cycle Time:	Approx. 3-4.5 seconds	Weight:	Approx.3.9kgs (tool with battery)
Oil capacity:	115ml		Approx.6.1kgs(tool with battery and jaw)
		Tool Size:	466×126×82mm

PZ-1550 Battery Press Tool Kit

MODEL NO.	DESCRIPTION	Weight(kgs)
PZ-1550	PZ-1550 Battery Press Tool Kit without jaws	9.20
	Battery, 18V, 4.0Ah Li-Ion	0.60
ACCESSORIES	Charger	0.50
	Plastic case	4.20

THE NEW FLEXIBILITY-ANGLE JAWS

Suit for narrow, angled installation areas which are difficult to access

R8 Angle Jaw

Provide with differentiated solutions according to customers requirement

R8 M15, R8 M18, R8 M22, R8 M28, R8 M35
R8 V15, R8 V18, R8 V22, R8 V28, R8 V35.....

R8 Angle Jaw

Spherical surface connection
Swiveling 180-degree-flexibility

Precision stamping connecting plate
Security design

Installation guide for 15mm to 35mm fittings

Preparation

1. Cut the tube square using a rotary tube cutter.

2. Care must be taken to ensure that tube is cut square, properly deburred and free from scores.

3. Deburr both internal and external tube ends then wipe clean of all swarf and debris to avoid damage to the 'O' ring upon tube insertion.

4. If a deburrer is not available use a fine file to prepare the tube end.

5. The tube must be fully inserted to the fitting until it meets the tube stop. Use a depth gauge or ruler to mark the insertion (socket) depth of the fitting onto the tube.

Joining 15mm to 35mm

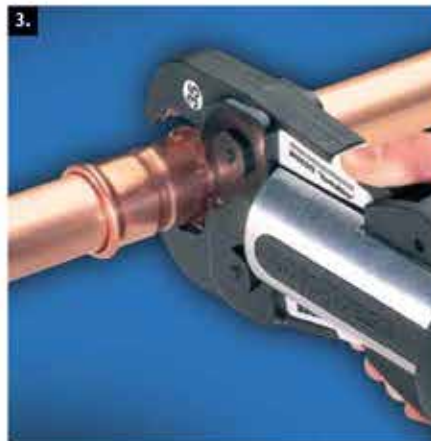

Please refer to the press-fit tool manufacturers instructions for detailed operating and safety information before pressing joints. Besco Gulpress Fittings recommends Novopress tools.

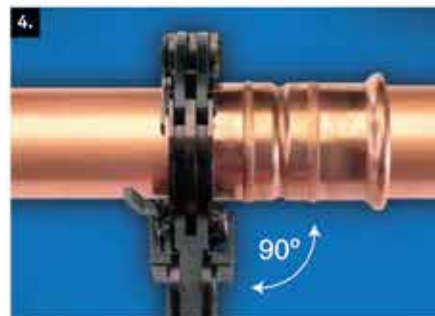

1. Keep all fittings in their bag prior to installation to ensure the lubrication does not dry out. Ensure the 'O' ring is seated correctly within the fitting socket.

2. Assemble the joint, ensuring the tube is inserted into the fitting until it meets the tube stop, using the insertion depth mark as a visual aid. Only when the tube reaches the tube stop should the pressing operation be undertaken.

3. Insert the correctly sized jaws into the press-fit tool and place them over the bead at the mouth of the fitting.

4. A 90° angle between the tube and jaws must be maintained when pressing all joints. The pressing operation should only be carried out when the tube is adequately supported by brackets, not when the tube is suspended in the fitting socket alone.

5. Press the trigger or button to start the joining cycle. When the jaws fully enclose the mouth of the fitting, the joint is complete. The jaw should then be released from around the fitting.

Spacing

Allow sufficient clearance around each fitting to allow press-fit jaws to be attached without hindrance.

Health and Safety

1. We recommend that eye protection is worn when operating all press-fit tools.
2. Do not activate a press-fit tool without a fitting in the jaws.

Installation guide for 42mm to 108mm fittings

Preparation

1. Cut the tube square using a rotary tube cutter.

2. Care must be taken to ensure that tube is cut square, properly deburred and free from scores.

3. Deburr both internal and external tube ends then wipe clean of all swarf and debris to avoid damage to the "O" ring upon tube insertion.

4. If a deburrer is not available use a fine file to prepare the tube end.

5. The tube must be fully inserted to the fitting until it meets the tube stop. Use a depth gauge or ruler to mark the insertion (socket) depth of the fitting onto the tube

Joining 42mm to 108mm

Please refer to the tool press-fit manufacturers instructions for detailed operating and safety information before pressing joints. Besco Gutpress Fittings recommends Novopress tools. 108mm XPress Copper fittings must only be pressed with sling jaws marked for copper only.

1. Assemble the joint, ensuring the tube is inserted into the fitting until it meets the tube stop, using the insertion depth mark as a visual aid. Only when the tube reaches the tube stop should the pressing operation be undertaken.

2. Select the appropriate size sling jaw, open the sling by depressing the spring loaded pin, pull the sling apart and place over the fitting. Make sure the groove in the sling corresponds to the bead on the fitting and the support plate on the sling fits over the tube side of the joint.

3. Turn the catch mechanism toward the locking pin, depress the spring loaded pin and push the catch into the pin until the mechanism engages. Revolve the sling around the fitting to the desired pressing position.

4. Attach the appropriate adaptor to the press tool and close the breach bolt.

5. Attach the sling by depressing the jaw levers and inserting the claws as far as possible into the grooves of the sling. A 90° angle between the tube and sling must be maintained when pressing all joints. Commence the pressing operation by pressing the trigger or button.

6. When pressing has been completed the adaptor should be disengaged by depressing the jaw levers, and the slings removed from the fitting.

108mm Second press

7. For 108mm fittings, the press sling should be left in place and the secondary adaptor attached. Re-check to ensure the tube is still fully inserted into the fitting and repeat the pressing operation to complete the procedure.

The 108mm joint is not fully made until the fitting has been through two pressing operations.

Lubricant

The use of lubricant is essential when joining large-sized fittings. The pressing profile groove(1) of the sling jaws should be cleaned and lubricated after every 50 joints for 42mm to 76mm sizes, and every 5 joints for 108mm. Dri-slide should also be applied between the main sling arms (2) and the moving segments; and along with the pivot pins (3) between the arms.

Note: Wipe clean any excess lubricant so that it does not come into contact with the fitting "O" ring.

Spacing

Allow sufficient clearance around each fitting to allow press-fit jaws to be attached without hindrance.

Health and Safety

1. We recommend that eye protection is worn when operating all press-fit tools.

2. Do not activate a press-fit tool without a fitting in the jaws.
