

## TABLES OF CASES

Erskine cites cases either by the name of one of the parties\* and the date of the decision or, where the case appeared in certain printed collections, by an abbreviated version of the name of that collection together with the number of the decision (but without the name of a party). This has made it necessary to provide two tables of cases. Table A lists all cases by name, including those cases which, in the text itself, are cited only by the name of the collection in which they appear. Table B lists cases by collection and so is limited to those cases which Erskine cites in this way. All the cases which appear in Table B also appear (by name) in Table A. A reference to the report in Morison's Dictionary (where there is one) is also added and, where the spelling of names varies as between Erskine and Morison, both versions are given in Table A.

The tables may thus be used in two ways. First, and conventionally, Table A makes it possible to find out whether Erskine cites a particular case and, if so, where. Secondly, both tables can also be used to find the citation in Morison's Dictionary of cases cited by Erskine: Table A for where Erskine cites by name of a party, Table B for where he cites only by collection.
