

PROHIBITION FROM EXHIBITING AT OR ATTENDING RABBIT SHOWS

Any member, in whose rabbitry a case of Myxomatosis is confirmed, must immediately notify the Secretary of the Association. **The member may not exhibit at any show until the elapse of 28 days from the last death and must complete a minimum 28 day quarantine** to ensure the safety and wellbeing of members' rabbits.

Any member, in whose rabbitry a case of Calici Virus (RHDV) is confirmed, must immediately notify the Secretary of the Association. **The member may not exhibit, judge, steward or handle rabbits at any show or attend any venue where rabbits are exhibited until the elapse of 120 days from the last death and must complete a minimum 120 day quarantine** to ensure the safety and wellbeing of members' rabbits.

Members must not exhibit if they have had unexplained deaths in their rabbitry within 14 days before a rabbit show. Calici Virus should be expected in any sudden death especially if more than one rabbit in the household has died.
