TECHNICAL DATA

WATER

A COLD WATER SUPPLY WITH WATER PRESSURE BETWEEN 0.13 MPA [19 PSI] AND 0.55 MPA [80 PSI] IS REQUIRED TO OPERATE ICE MAKER. IF YOU HAVE QUESTIONS ABOUT YOUR WATER PRESSURE, CALL A LICENSED, QUALIFIED PLUMBER.

LOCATION

TO ENSURE PROPER VENTILATION FOR YOUR ICE MAKER, THE FRONT SIDE MUST BE COMPLETELY UNOBSTRUCTED. THE ICE MAKER MAY BE CLOSED-IN ON THE TOP AND TWO SIDES, BUT THE INSTALLATION SHOULD ALLOW THE ICE TRAY TO BE PULLED FORWARD FOR SERVICING IF NECESSARY.

INSTALLATION OF THE ICE MAKER REQUIRES A COLD WATER SUPPLY INLET OF 1/4" (6.35 MM) OD SOFT COPPER TUBING WITH A SHUTOFF VALVE OR DRAIN PUMP, ONLY TO CARRY THE WATER TO AN EXISTING DRAIN.

CHOOSE A WELL VENTILATED AREA WITH TEMPERATURES ABOVE 55°F (13°C) AND BELOW 110°F (43°C). BEST RESULTS ARE OBTAINED BETWEEN 70°F AND 90°F (21°C AND 32°C).

IMPORTANT

A DRAIN PUMP IS NECESSARY WHEN A FLOOR DRAIN IS NOT AVAILABLE.

NOTES

IF THE DRAIN HOSE BECOMES TWISTED AND WATER CANNOT DRAIN, YOUR ICE MAKER WILL NOT WORK. IT MAY BE DESIRABLE TO INSULATE THE DRAIN LINE THOROUGHLY UP TO THE DRAIN INLET.
