- | | |
|---|--|
| <input type="checkbox"/> Confirmation of pregnancy | <input type="checkbox"/> Standard blood & urine tests |
| <input type="checkbox"/> Standard blood & urine tests | <input type="checkbox"/> 1 st Trimester/Dating Ultrasound |
| <input type="checkbox"/> Prenatal Screening Counselling | <input type="checkbox"/> First Trimester Screening (blood work and ultrasound) |
| <input type="checkbox"/> Anatomy screening ultrasound | <input type="checkbox"/> Gestational Diabetes Screen (24-28 weeks) |

***Note – our midwifery team will access all labs/ultrasounds on Netcare/Connect Care and will organize any outstanding items that have not yet been counselled/completed**

Midwives are primary care providers who can diagnose, monitor, prescribe medications, and treat common infections and complaints in pregnancy such as UTIs, yeast infections, nausea and vomiting in pregnancy. Any pregnant person accepted into care will have access to a pager number to receive urgent care and response 24/7. Midwives provide care in the community setting, and are the admitting and attending providers to their clients in pregnancy, labour, birth at the Calgary hospitals (PLC, FMC, RGH, and SHC).
