

Did you know micrographia is a symptom of Parkinson's Disease?

Let's Combat Micrographia is an eight-week workshop, targeting micrographia, also known as, small-handwriting. We are taking it back to the basics and through these consecutive workshops will work on different ways to improve your handwriting. We will be learning how to re-write and observing the impact on our writing and reaction time over the course of the next nine weeks. This project is supported by The National Network of Libraries of Medicine, a branch of NIH.
