The most important part of a customer's experience is after the sale.

At Knight, we've embraced a lot of change since we started in 1987. We've grown from a small family business to become an industry leader throughout New Zealand. We know our roots, never tried to be too serious, or pretend to be something we're not. What we are serious about, is the relentless pursuit of quality behind our products.

We design, and build for endurance, then rigorously test to the equivalent of 15 years of average usage. We've spent years researching and putting into place production controls that comply with international certifications. We guarantee a true promise of quality & design that stands the test of time. The home of New Zealand's best office furniture warranty.

Introducing the ultimate office furniture warranty.

All Knight Group products are durable for long-term performance and value. Our range has been rigorously tested to the equivalent of 15 years average use, and our processes comply with internationally recognised certifications. We know the peace of mind a warranty like this can give when making a purchase. If you need to know any information about the legal terms of your warranty, you can find everything right here, or simply give one of our friendly account managers a call.

The 15 Year Warranty is valid on orders placed on or after 1st October 2018.

Warranty

Knight Group promises the original purchaser that it will repair or replace with a comparable product, at its discretion and free of charge (for material and components) any product, part or component warranty term (taken from the date of purchase). Normal commercial usage is defined as the equivalent of a single shift, 40-hour work-week.

Upon lodging a warranty claim, a copy of the original purchase order (or advise of this purchase order reference number) along with a detailed description of the service required and a photograph or video outlining the fault, must be provided to Knight Group.

Goods purchased from Knight are covered by guarantees that cannot be excluded under the New Zealand Consumer Guarantees Act. The Customer is entitled to a replacement or refund in a case of major fault, and to compensation in the case of reasonably foreseeable loss or damage. Goods will also be repaired or replaced if they fail to meet acceptable quality standards and the failure does not amount to a major failure.

Minor variations in dimensions, colour, grain, or finish in Goods received by a Customer, when compared with images or descriptions on the Website, are not covered by this Warranty. The Warranty does not cover damage that affects only packaging. Goods will also be repaired or replaced if they fail to meet acceptable quality standards and the failure does not amount to a major failure.

Warranty Exclusions:

This warranty does not apply and no other warranty applies to:

- Products that were not installed, used or maintained in accordance with Knight Group instructions.
- Normal wear and tear, which is to be expected over the course of ownership.
- Upholstery fabric (including mesh) and textiles.
- Abuse, misuse, accident, or repeated knocks, for example by rigid armrests against laminated desk edges.
- Alteration or modification of the product including substitution of Knight Group components with any unauthorised non-Knight Group components.
- Variations occurring in surface materials (e.g. colour fastness, sheen on laminates or matching grains, textures and colours across dissimilar lots).
- Upholstered armrests.
- Products used for rental purposes.

To the extent allowed by law, Knight Group makes no other warranty, either express or implied, including any warranty of merchantability or fitness for a particular purpose. Knight Group will not be liable for any consequential or incidental damages.

Knight reserves the right to update warranty conditions specified in this document as and when required.

Delivery Services

Please contact our team to discuss your delivery and project requirements and request a quote.

Free Freight for Business Delivery

Knight Group standard pricing includes free freight to the ground floor of a business address with access between standard business hours Monday – Friday and allows for a total of 15 minutes for a delivery.

Free freight includes delivery to a business district located in metropolitan, large or medium regional centres of New Zealand.

Freight will incur a delivery charge for:

- Deliveries to *small regional areas may incur an additional delivery charge.
- Deliveries to any business located from a home office or located outside of a business district.
- Urgent freight requests
- Private & home deliveries (charged per consignment)
- Saturday delivery (when possible)
- Delivery to multi-storey levels
- Delivery to rural, remote and offshore locations
- Coordinated deliveries to meet a specific date
- Large consignments that require additional time on site
- Selected freight carriers outside of the free freight offer

Please enquire prior to placing an order regarding delivery charges.

Please note:

- Multi-level charges can be calculated by visiting the Knight Group website or please check with the Knight Group team for current rates. Large consignments require a project quote.
- Extra charges will apply on top of the per piece charge for multi-storey level deliveries with no lift access (requiring a stair lift). Please call for a freight quote prior to placing an order.
- Set rural delivery charges (per piece) exclude delivery to Waiheke Island and other offshore and remote locations. Please call for a quote.
- Knight Group retain the right to select carrier for freight free delivery. Please request a quote if you require a specific carrier for your delivery.

For deliveries that require a more specialised service (delivery on a specific day or time, special delivery instructions).

Please request a quote.

Freight carriers allow a total of 15 minutes for a delivery and can be requested to remain at the delivery address for up to 15 minutes (including time to deliver) to allow the receiver time to check the goods.

Freight Acceptance Policy

Deliveries of furniture from Knight Group are undertaken by selected freight carriers. Furniture is dispatched from Knight Group warehouse in good order & condition – acknowledged by the freight provider by way of signing the consignment note when the furniture is dispatched.

When the product is delivered to you (or your customer), you will be asked to **sign** a consignment note, accepting delivery and responsibility for the product. Once you have done so, the product, in whatever condition it is in, is solely your responsibility (excluding any manufacturing fault, which is covered by warranty), **and no claim for damage will be accepted beyond that point.**

Freight carriers will stay at the delivery address for **15 minutes** to give the recipient time to carefully check the goods. The steps you take are crucial!

If extra time is required to check the goods for damages, please contact the team to pre-arrange with our freight partners where possible.

1. Carefully check the goods for any visible damage before signing for them.
2. The delivery driver must wait for a signature on the consignment note before leaving the product on your premises and in your control.
3. **Do not sign for the goods as in good order and condition unless you are satisfied there is no damage.**
4. If you or your customer are not satisfied with the condition of the packaging and the product within is damaged, please do not accept delivery of the damaged item. Please contact Knight Group to arrange a replacement.

Please advise your customer to report a damage, freight companies do not automatically advise Knight Group if you or your customer receive a damaged item. **Consignments rejected as damaged are to be reported within 3 days for claim to be accepted.**

Ordering

Please ensure when ordering products, that the correct product codes and descriptions are used.

GST

All Knight Group pricing excludes GST.

Freight Policy effective from 1st January 2023.

5. If you or your customer are **unsure** about the condition of your product due to minor packaging damage, please accept the delivery and sign the consignment note with damaged clearly marked while you check the condition of the product once packaging has been removed. **Consignments accepted but signed for as damaged are to be reported within 24 hours for claim to be accepted if the product is in fact damaged.**

Please contact Knight Group to arrange collection and replacement of the damaged item. Please advise your customer to report a damage, freight companies do not automatically advise Knight Group if you or your customer receive a damaged item.

6. **Under no circumstances should you mark the consignment note with STI or Subject to Inspection. This is not accepted by any freight carrier as a basis to claim for damage.**

7. Please be clear that once you or your customer sign to accept delivery of the product, you are accepting full ownership for that product in its current condition. If you find concealed damage, please notify us immediately and no later than the day of delivery, we have a small window to investigate claims delivered that day dependent on the freight carrier responsible.

8. If the recipient (either you or your customer) doesn't follow this procedure, **there is no claim option available**, and the cost must be accepted by your company.

While we understand this will take a little more effort at the time of delivery, we are confident that it will improve the whole delivery process and help to reduce the amount of complications should there be any damage to your orders.

CHECK Before You Sign!

Please **OPEN** this package and check for any sign of damage **BEFORE** signing the delivery note.

Carrier's regulations state you can NOT make a claim for damage when signed for in good order and condition.

Re-stocking Fees

A re-stocking fee will apply to any goods to be returned to stock at the request of the customer, when Knight Group have supplied items correctly as ordered i.e. Customer order error.

The restocking fee = 25% of the cost of the goods with a minimum charge of \$100.00 + GST

Eligibility;

For items to be eligible for a return to stock they must be in the original packaging in which they were received, in as new condition.

The following items CANNOT be returned;

Items that have been opened or repackaged

Handmade seating

Custom items (eg. Studio50, Active25, Team Tables, Tops, items with custom fabric)

Example 1:

2 x Cubit Mobiles sold at \$236 + GST each.

Customer is returning BOTH Units

2 x \$236 = \$472

25% of \$472 = \$118

Re-stocking Fee of \$118 + GST

Example 2:

2 x Cubit Mobiles sold at \$236 + GST each.

Customer is returning ONLY 1 Unit

1 x \$236 = \$236

25% of \$236 = \$59 + GST, so in this instance the minimum fee would apply.

Re-stocking Fee of \$100 + GST

The return freight costs included in the re-stocking fee.

Knight reserves the right to update re-stocking fees specified in this document as and when required.

Delivery Timeframes

Delivery timeframes once your order is ready ship (Refer to production lead-times).

North Island: Allow up to 5-7 working days

North Island to South Island: Allow up to 7-10 working days

South Island: Allow up to 5-7 working days

South Island to North Island: Allow up to 7-10 working days

Rural & Home Delivery: Allow up to 10 working days (dependant on courier runs)

Production Leadtimes

Please note for LARGE (50+) or CUSTOM orders – enquire for lead times.

Studio50 & Active25 Screens: 10 working days

Seating: Lead times vary – refer to seating table on following page

Custom Tables & Tops: Leadtimes vary – ask your Customer Relationship Specialist

Certifications and Standards.

At Knight, we take great pride in the quality, values, and operational excellence of our products. The products we offer are backed by our commitment to adhering to a variety of certifications and standards. This proactive approach ensures that our products meet the highest standards of quality and safety, benefiting both our customers and the environment. Below, you'll find details on the certifications and standards we adhere to.

ISO 14001

ISO 14001 Certification is the international standard that specifies requirements for an effective Environmental Management System (EMS). It provides a framework that Knight as an organisation can follow. At Knight we are using this framework as an approach to continuous improvement across all environmental aspects of our business.

ISO 45001

ISO 45001 is the benchmark to assess Occupational Health & Safety Management systems for organisations. This standard contains vital information about meeting legal requirements and invaluable guidance on how to establish sustained improvement in health and safety performance in your business.

ISO 9001

ISO 9001 Certification is the world's most widely recognized Quality Management System (QMS). At Knight it's our guiding principle to meet the expectations and needs of our customers through quality management systems that continually monitor and manage quality across all operations to deliver consistent performance and service.

Warranty

WARRANTY

Knight Group guarantees you for up to 15 years against faulty parts and workmanship based on a normal 40 hour week.

AFRDI

AFRDI Certification is a set of standards covering strength, durability, stability and safety (and ergonomics in the case of desks and workstations). This means that Knight are accountable for maintaining the quality of our products, submitting them for regular auditing to ensure they meet the highest standards for commercial use. **Applies to: Evo, Evo Luxe, Plymouth, Urban Mesh and Haven Electric Desking (Level 6 – Severe Commercial).**

GreenTAG

Global Green Tag certified products pass the world's toughest standards to protect you, and your family's health and safety, minimise your impact on our finite planet and put the power of selection back in your hands. **Applies to: Haven Desking**

GreenGuard

Products that have achieved GREENGUARD Certification are scientifically proven to meet some of the world's most rigorous third-party chemical emissions standards, helping to reduce indoor air pollution and the risk of chemical exposure. **Applies to: Metro, Tone, Huracan, Stax, Vulcan**

BIFMA

BIFMA Certification focuses on safety and performance standards developed by the BIFMA Engineering Committee. The standards provide manufacturers, specifiers, and users with a common basis for evaluating safety, durability, and the structural adequacy of the specified furniture, independent of construction materials. The standards define specific tests, laboratory equipment to be used, the conditions of test, and the minimum acceptance levels to be used in evaluating these products. **Applies to: Vogue, Aero, Flex, Urban Mesh, Blade, Tone, Eagle, Lume, Cygnet, Solace, Haven Desking, Boost/Agile Mobiles**

FSC

FSC (Forest Stewardship Council) certification is a globally recognised standard for sustainable forest management. It ensures that forest products are sourced from responsibly managed forests that provide environmental, social, and economic benefits.

The certification process involves compliance with ten principles and 56 criteria, covering issues such as biodiversity conservation, protection of water resources, and respect for indigenous peoples' rights. FSC certification is widely respected and often required by international markets that prioritise sustainability, making it a key tool for companies seeking to demonstrate their commitment to responsible sourcing.

E1 Board

LFE stands for Low Formaldehyde Emission and is known as "E1", an internationally recognised standard of safety for composite wood board. This certification characterises an engineered wood product that is unobjectionable for almost all intents and purposes and may be used for interior finishing and furniture.

E1 boards have formaldehyde levels so low as to be undetectable on many occasions and are on all occasions well below occupational and environmental standards including the threshold for cancer (2.4mg/m³) defined by the World Health Organization (WHO). Our E1 boards have undergone ASTM testing, a test method which is an internationally recognised standard.

ISO 14001

Our ranges are manufactured in factories accredited to ISO14001. This internationally recognised and independently certified Environmental Management System (EMS) plays an important role in decreasing pollution and waste in the manufacturing process and reducing the overall environmental footprint of a factory's operations.

Eco Friendly Packaging.

As consumer awareness around environmental sustainability continues to rise, the demand for products that align with eco-conscious values has become increasingly prominent. Knight Group recognises this shift and is committed to not only offering eco-friendly packaging but also adopting sustainable business practices throughout its operations.

Knight has implemented policies and practices aimed at protecting the environment, conserving natural resources, and minimising waste generation.

One significant step in this direction occurred in 2023 when Knight introduced 'Eco Friendly' packaging for all its desking and storage items. This initiative aimed

to reduce the company's carbon footprint by utilising materials that are more environmentally friendly and less harmful to the planet.

Building upon this milestone, Knight continued its dedication to sustainability in 2024 by initiating research and development efforts focused on using seating bags that can be recycled.

To make it easier for consumers to identify these environmentally friendly changes, Knight has introduced a distinct labelling that will be prominently displayed on the packaging. These labels serve as a visual cue for consumers to recognise and support Knight's efforts towards sustainability.

Eco-friendly
Packaging

A good choice for the environment.

With our commitment to providing sustainable recycling options to our customers, we required a solution for the disposal of our chair bags. Knight are proud to announce we have partnered with Future Post.

Future Post are an innovative New Zealand company that have found a way to recycle domestic and commercial plastic waste, which they use to produce BioGro™ certified posts. This has the two-fold benefit of reducing the amount of plastic waste going into landfill, as well as providing an alternative option to treated timber fencing which can cause the leaching of chemicals into

the soil and waterways. Future Post offers a partnership program to like-minded companies wanting to provide a recycling option for their plastic products.

Our seating bags are used to protect our chairs while in transit and when no longer required they can be disposed of at many 'soft plastic recycling' locations around NZ or returned to Knight and our team will collate and send the bags to Future Post, to be processed through their recycling facility and manufactured into posts. It's a simple way for us to continue creating a positive environmental and social impact.

For more info or to find a recycle centre near you, visit knightgroup.co.nz/environment

Welcome to Knight's 3D Layout Service.

FREE* 3D layout service for office fit-outs of 10 seats or above.

When you are pitching on an office fit-out, assisting your client in visualising exactly how their furniture will work in their new office space can significantly increase your chance of having the winning bid. At Knight, we want to do all we can to help your proposal/tender to be successful. When you specify Knight furniture in a floorplan or space design, you can utilise our designers to draw a 3D model of your space. This enables you to show your client how well their new office layout will work, giving them complete confidence to make their purchase!

- Step 1. Contact your Account Manager** – give an overview of the entire job, including the budget and time frame.
- Step 2. Supply floor plan with dimensions** – this can be as simple as a line drawing or as detailed as a CAD drawing.
- Step 3. Indication of furniture** – this can be drawn on the floor plan but should be accompanied by an Excel spreadsheet indicating which room has which furniture.

As always, your account manager will be available to assist you in making recommendations on the best furniture for your client's budget and requirements.

The final layout – When we complete your new 3D layout, you will receive a collection of images, taken from many different angles, like some of the examples on the following page.

***Please note that one set of changes applies to FREE drawings. Any additional changes will be charged at \$70 + GST per hour.**

Contact the team NOW to get started.

Focus.....	68

Multi Person

Team.....	69
Team+.....	69
Studio.....	69

Every workplace needs quiet space.

Office pods, also known as work pods or personal workspaces, have emerged as a popular solution for creating focused and private working environments within shared spaces. Pods can help solve the dilemma of a noisy open office by providing a quiet space free of office distractions.

Pods are essentially small rooms within other rooms and offer private places where people can make phone or video calls, or simply somewhere to work in

silence. They can easily be installed and do not have the disadvantages of building additional spaces the traditional way – no building consents, disruptions, or unseen costs.

Incorporating one or multiple pods into your workspace can result in time, energy, and cost savings. They offer a straightforward means to boost efficiency and enhance team productivity.

Materials

Pods are designed with sound absorbency in mind to create a quieter and more focused work environment. With specialised acoustic materials and engineering, pods help reduce noise pollution, making it easier to concentrate on tasks or have confidential conversations without disruptions from the surrounding office space.

Haven Pods are constructed with a 57mm thick wall made up of layers – sound absorbing recycled PET panel, high-density sound absorbing cotton and powder-coated steel sheets – for maximum sound insulation.

Features

Glass

Dual-pane laminated tempered acoustic sound control glass with a 5mm+5mm thickness. Optional switch glass for added privacy (indent only).

Body

45mm thickness – multi-layer sound insulation material encased between galvanised steel plates.

Interior Surface

12mm environmental-friendly flame-retardant sound absorbing recycled PET panel.

Carpet

Environmentally friendly nylon carpet that is wear-resistant, flame-retardant, waterproof, anti-slip & anti-fouling.

Motion Sensor

Smart sensor activates lighting and fans, helping you stay energy efficient. Power consumption when in use 29W.

Fan

Safe, low voltage, ultra quiet, 300mm large air volume fan. Fan speed: 750rpm, Air Volume: 90CFM. Complies to cUL CCC ROHS certificate. Adjustable via dial in pod.

Ventilation

Smart sensor-based ventilation system. During occupancy, the air is refreshed every 3 minutes, and when unoccupied, the system runs for 15 minutes every half an hour to uphold the level of freshness.

LED Lighting

Overhead built-in LED 4000K smart sensor lighting. Complies with CE Certificate.

Sound Insulation

Engineered to reduce noise by 30dB. SGS environmental certification.

Power Outlets

Each pod is equipped with a USB Type B and C ports for charging your phone, along with two 10A 250V AC power outlets for plugging in your laptop.

Power Supply

Standard 250V three-pin plug that plugs straight into a wall socket (no hardwiring required) with 1.8m length power cord.

Feet/Castors

Designed with concealed casters for easy relocation and moveability, along with leveling feet to accommodate uneven surfaces.

Installation

Modular installation – No glue or nailing involved during the installation. Installation must be carried out by our accredited pod installers.

Warranty

For added peace of mind Haven Pods come with a five-year warranty for structural defects and a one-year warranty for electrical components. View warranty details and restrictions here officepods.co.nz/warranty

Features

- 1 person lift and install - Studio50 is a dream to install and re-configure. Shedding many of the cumbersome components of conventional screen systems.
- The core and frame are 100% recyclable and hand built here in New Zealand.
- 50mm extruded aluminum frame with auto-locking connection.
- Studio 50 screens are pinnable and can be upholstered in any fabric of your choice making it easy to add colour to your office space.
- A wide range of glazing options available.
- The generous cable management cavity is designed to accommodate Category 6 wiring and can be placed above or below the desks.
- Straightline, 90° or 120° configurations.
- Install options include integrated desking, desk mounted screens, as well as freestanding and mobile partition options.
- Built to last with super strong build with serrated flathead fixings made from high quality carbon steel.
- Studio50 stands on an adjustable levelling glide with 35mm travel for uneven floors.
- Screen dimensions larger than 1200 high will require a transom. Standard transom height is set at 1200 high unless otherwise specified.
