

## **"Caution: Non-Genuine OXYTANE Products Circulating"**

*Check for legitimacy. Avoid poor performance or damage.*

TO WHOM IT MAY CONCERN,

We are **URGING** consumers to take action **IMMEDIATELY** and to please **STOP** using **ANY** and **ALL** products you may have received/bought from Ali Ibrahim Ishmail of "Oxytane International" or any company associated with him, along with his colleagues/contacts and you should reach out to us right away.

We understand that Ali Ibrahim Ismail and his colleagues have attempted to reverse engineer AMJ's OXYTANE™ and have been selling it as the original product. While he may have offered for trial, some of the original and genuine AMJ OXYTANE™, the one we believe he has been selling most of, is **NOT** the original genuine product and therefore may be ineffective and could damage your engine. The Oxytane being offered and sold on the websites below is in all probability, counterfeit OXYTANE:

[Oxytane® | Driving a low carbon economy - Oxytane International](#)

[OXYTANE® - INDONESIA - Your Best Engine & Fuel Solution](#)

[Save fuel, protect the environment](#)

[Oxytane Fuel Treatment Solutions for Efficient Fuel Usage | Oxytane](#)

I, Michael J. Colburn, am the Owner/MD of AMJ Chemical Inc., the original and only manufacturer of the real genuine OXYTANE™ in the world. AMJ's OXYTANE™ is also sold by RunGreen International as X-Carbon in the UK, Europe, and Africa. Then there is OxyNox in Switzerland, who sells AMJ's OXYTANE™ under their brand throughout Europe, Middle East, and South America. The product we've formulated and manufactured has been the subject of over 30 years of Research and Development and is costly to produce, involving the use of a plasma chamber, in turn, making the basic ingredients effective. This product has been widely tested and proven effective and safe to use in **ALL** hydrocarbons and machinery. As the world is increasingly recognizing OXYTANE's efficacy in restoring engines to "As New" performance levels, indicated by restored fuel efficiency, the cleaner, smoother running engine operations, and lower emissions, consumers must be sure they are receiving the **genuine/original** product that is **safe** and **effective**. OXYTANE™ is not only registered with the US EPA, been tested by Intertek, AmSpec and many other organizations, but it is also **Trademarked**. All of that is Public Information and can be found at the appropriate government sites. Any other products purporting to be the same, cannot be assumed to be similarly safe, nor effective, if they have not been manufactured by AMJ Chemical, Inc., and distributed by my approved list of contacts/distributors listed on our website at <https://www.oxytaneglobal.com>.

Very Respectfully,

Michael J. Colburn  
Owner/Managing Director  
AMJ Chemical, INC.
