

# PEAQ SOLUTIONS

## SUPPORT FOR ALL YOUR PRODUCT NEEDS IN MANUFACTURING

### Evaluate Design brief and production is to quality and customer expectation

The service we are offering is to review the Quality processes that sit around a new product or major product changes and assess how they work for the products that you manufacture or are the brand owner contract manufacturing. We ensure that the design brief is met in the production of the products and all supporting processes are specified and adequate controls in place. We will identify any gaps and solutions to problems in manufacture. We will ensure info for supporting your products and quality systems compliance to regulations is complete. We also will review existing products and evaluate if they meet current design intent or customer expectations analyse for deviations to specs and identify any cost saving opportunities.
