

## Internal Auditing

Internal auditing is a powerful tool to measure the health of processes and systems in your organisation. At PEAQ we have a simple approach to ensure they are in good fit for purpose working order.

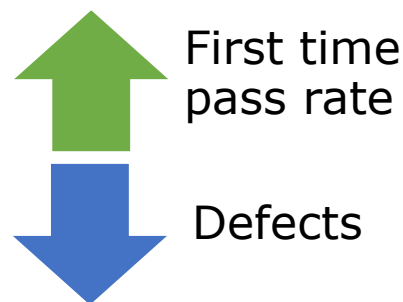

### PEAQ 3 step audit process

### Audit output

### Measured benefits

We can perform audits to meet your business needs vertical or horizontal based on an agreed scope with outputs that will really drive quality. If it's one specific process or all your processes we can help. We will produce a meaningful output and actions that can be worked on together to ensure an effective close out and gain the measured benefits.
