

External Auditing

Powerful tool to measure supplier's capability of process and systems in relation to your needs as a customer. At PEAQ we believe that quality is at the heart of the relationship and have a simple approach to ensure it is working to the best possible benefit for all involved.

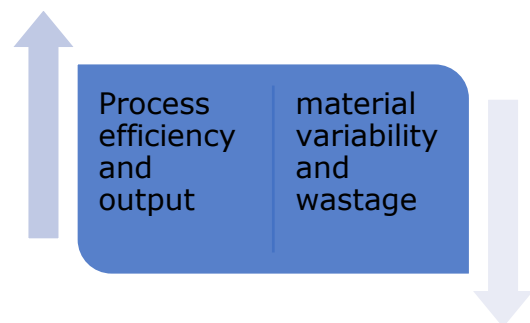

PEAQ 3 step audit process

Audit output

Measured benefits

We can perform supplier audits to meet your business needs either by consultation and documentation assessment, or site based to an agreed scope with outputs that will really drive quality. If it's one material or service specific, all the way to multiple materials or processes we can help. We will produce a meaningful output and actions that can be worked on together to ensure an effective close out and gain the measured benefits from the suppliers to enable you to achieve improvements.
