

INTERNAL AUDITS | OVERVIEW

PEAQ offers outsourcing solutions for internal audits.

Internal audits are the first-party audits typically conducted by the individuals within an organization or by an outside party on behalf of the organization in order to verify conformance of the organization with one or more of the following:

- Conformance with specific quality requirements such as ISO9001, & BRC.
- Conformance with customer contractual requirements
- Compliance with applicable regulatory requirements.
- Process and product improvement

INTERNAL AUDITS | OUTSOURCING

Outsourcing internal quality audits can save you a lot of time and money. Since internal audits are infrequent, and they can be performed in a fairly small amount of time, it is generally challenging to justify and maintain competencies and credentials of in-house auditing personnel. Outsourcing would allow your valuable resources to focus on the day-to-day operations while contributing to the organizational strategic objectives. Conducting an internal audit would become one less thing to worry about when seeking conformance to the standards that require internal audits and independent assessments.

PEAQ offers internal audit outsourcing solutions that give you access to qualified and experienced professionals on an as-needed basis. We conduct audits in accordance with the auditing requirements for management systems defined in ISO 9001:2015 & BRC auditing requirements.

We also perform **desktop audits** of the quality management systems and quality assurance plans. Simply send us your QMS documentation and we will verify its conformance to specified requirements.

[CONTACT US](#) to outsource your internal audits to our experienced and skilled professionals today! We will apply the right level of scrutiny to identify conformances, non conformances and opportunities for improvement while providing a fresh independent perspective and assisting you in reaching your quality objectives.
