

# **PEAQ SOLUTIONS**

## **SUPPORT FOR ALL YOUR QUALITY PROCESS NEEDS FOR PRODUCT MANUFACTURING**

**Evaluate your processes to product fit, optimise in operation quality and efficiency – meet compliance whilst reducing issues and costs**

The service we are offering is to review the Quality processes that sit around a new product or process and assess how they work for the products that you manufacture. We will identify any gaps and solutions to integrate into your current systems. We will supply detailed info for supporting your products and quality systems. Typical support with product specifications, SOP's, PUWER, Foreign body assessment, HACCP/ TACCP/FMEA flows and plans. complete any fixes required that will address your practical requirements of your business and also meet your Quality system standards compliance.
