

# PEAQ offers Risk Management

Risks are present in all organisations and they need to be identified, assessed and managed to mitigate the effect of detrimental impact; irrespective of whether they stem from internal or external sources.

Our services are linked to your strategic objectives, allowing us to help reduce your risks and enhance the effectiveness and efficiency of your management systems to drive continual business improvement and competitive advantage.

## **Organisational Benefits**

With a commitment to process efficiency and operational improvement underpinning organisations worldwide, our risk management services provide you with solutions to enable you to:

- ✓ Manage organisational improvement and mitigate your risks
- ✓ Improve productivity and business agility
- ✓ Reduce costs
- ✓ Improve customer experience
- ✓ Increase visibility on risks and areas for improvement before they become critical
- ✓ Effective preventive action to reduce quality issues

## **Risk management services**

- **Risk assessment and incident investigation**
  - Process risk assessment and incident investigation services are tailored to assess your specific risks whether they are internal, external, customer or supplier related.
- **Risk identification, analysis and evaluation**
  - Assess risk severity and impact on process/organisation, the likelihood of occurrence and effectiveness of controls in place.
- **Preparation and management of risk registers**
  - Assess possible solutions or mitigation to control risks, developing detailed task actions and schedules to address root cause of risk.
- **Risk monitoring and mitigation control**
  - Review progress with addressing risks and assess action effectiveness to mitigate risk.
