Re: STEAM Varsity Letter

During the 2014-2015 school year, our school administration approved a STEAM Varsity Letter for members of our High School Robotics Team. For the past few years, members had received a certificate indicating this award, but no varsity letter was actually presented. Through the work of our dedicated members, last year was the first year that our team members were awarded a physical STEAM Varsity Letter. This process took a bit of time and planning. This information is provided to assist you, in the event that you do not already award your team members with a STEAM Varsity Letter. We have attached a copy of the Varsity Letter and on the back, we have included the guidelines that are associated with this award. Below we have included the name and company that created the file in order to save you time locating a vendor that is familiar with the project:

TSS Printing  
Bob Jesmain  
518.207.5781

We hope that you find this information useful and that we can help you to recognize the efforts and dedication of your team members. Additionally, our district now plans to also present this STEAM Varsity Letter to members of our Science Olympiad team and Troupe, our theater production group.
