Hi DR Mohammad

We write this email to you today to

- 1) declare the results of Maher Ali Rusho (54789789137798),
- 2) request contact information of your school authorities.
- 3) seek your consent to share the score report with your school and
- 4) request a few photographs of the student for the website

Why points 2,3,4, you may wonder? That's because your child has done incredibly well and has been awarded the title of **International Maths Olympiad Challenge Elitist!**

What an achievement! Congratulations! Very few from your country have achieved this.

Score report

We have attached the Maher Ali's scorecard. As per the course you have enrolled for, we are sending you the Basic Score Report. The report will indicate Maher Ali's performance at the Olympiad. Since your child has scored between 80 and 95 percentile, the report indicates the title conferred on the child- **IMOC Elitist**.

A quick recap- Students scoring between 80 and 95 percentile are conferred the title of an IMOC Elitist, and those scoring above 95 percentile are conferred the title of an IMOC Champion.

Since Maher Ali is an Elitist, you will receive a follow-up email on 14th December regarding accolades such as certificates, medals, and T-Shirts. Sounds exciting, doesn't it? 😊

.

If you wish to review the Maher Ali's complete performance, you can avail the Enhanced Score Report. The Enhanced Score Report (ESR) gives you a detailed report of Maher Ali's performance v/s

- a) the Test
- b) the Rest of the world (including world percentile)
- c) the Rest of your country (including country percentile)
- d) the Best of the world
- e) the Best of your country

To procure the ESR you need to enrol for the ESG courseware. To do that, you need to first [login](#), go to the [fee](#) page, select the correct grade and then enrol for the ESG course. Once you register, we shall provide you with the ESR in 2 business days.

School information and consent:

We would like to inform your school of your child's splendid performance. To do so, we would like to email the relevant school staff member. There is a form at the end of this email where you can fill out this information. The form will also seek your consent which will permit us to share this information with your school.

Student Photographs

We would like to showcase our student winners on our website and social media channels. If you are as eager as us to have Maher Ali displayed as a winner, you can send us some of Maher Ali's photos. These are some suggestions:

- 1) It would be great if Maher Ali were wearing the school uniform.
- 2) The picture quality should be good and of high resolution.
- 3) The background should be preferably clear.

You can submit up to 4 photographs. We will pick the best.

Thanks for your participation in the International Maths Olympiad Challenge. The competition was intense, and we are glad that Maher Ali participated and aced the test. The objective of the Olympiad is to give students a feel of the competition at a global stage and nudge them towards furthering their maths skills. We hope we have achieved that.

Click [here](#) to go to the form. The deadline to submit it is 13th December 9am EST.

Congratulations once again!! You must be so proud of Maher Ali

Cheers

Support team at the IMOC
