

supercell Plate cutter

The features of these plate cutters alleviate lost time searching for razor blades to accurately cut your flexo plates. The flexible work lamp provides intense lighting where needed to ensure accurate cuts, and the work table grid allows for easy alignment with see-thru photopolymer plates registration marks. Beveled cuts are made simple by the design of the blade for butt joints on reverse printing plates, so you don't even have to tilt the table!

Features

- ▶ Increased Productivity
- ▶ Eliminate Ruined Plates
- ▶ Produce Beveled Edges
- ▶ Trim Plates to Final

SIZES

- ▶ PCA-11.5 - 11.5"
- ▶ PCA-18 - 18"
