

PROTECT A POT

Stop Crab and Crayfish pot catch and equipment theft.

Attach POT ALARM to the inside of your crab/cray pot - SET & FORGET

POT ALARM

Auto-Arms in Water – Drop your pot, Pot Alarm senses salt-water and silently arms itself.

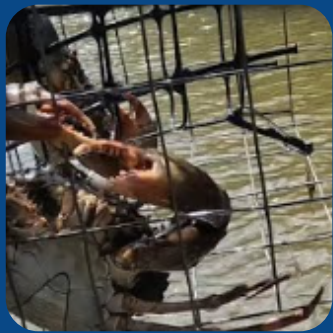

Lift = Countdown – The second the pot leaves the water; an inbuilt timer gives you seconds to tap your fob.

NO FOB? NO CHANCE! – If a thief is on the other end of the line, Pot Alarm erupts with a 120 dB alarm that turns all heads on the waterway.

Rugged & Waterproof – Marine-grade anti-tamper device and clamps, up to 2 year battery, nothing to pair, nothing charge, no switches.

Sleeps - when your pot is out of the water.

Repeat – Drop it back in, it re-arms automatically. Set-and-forget protection.

Aussie Invented

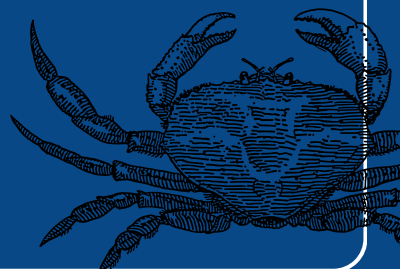

LOUD

FIT & FORGET

Built for our waterways

- Stops equipment and catch theft with an immediate deterrent that everyone can detect within kilometres
- Commercial and Recreational fisho's keep all their gear and catch ALL the time. Your equipment & catch is now fully protected against thieves
- Reduces Fisheries enforcement and patrol burden & makes prosecution easier
- Thieves are pinpointed by all waterway users
- Reduction of Ghost pots chocking our waterways
