

Timeka Scales

Jonesboro Community Liaison

Timeka is a native of Jonesboro Arkansas and has a heart to improve her community and those around her. She currently works for the Jonesboro Public School district where she connects with students in and out of the classroom setting. She has experience as a special education para professional and a classified staff in elementary and middle school. Timeka has a passion for helping others succeed in a number of ways and offers that to many of her students through mentorship.

Timeka strives to reach the Jonesboro community through community engagement. She hopes to bring awareness to the North part of Jonesboro by making the area more aware of resources available to them. She looks forward to learning how to provide information to individuals within her demographic area, who may have concerns on how to communicate with various organizations, and what community involvement and public engagement looks like.
